Easter Sunday	April 13	April 1
Ascension Day	May 22	May 10
Pentecost—Whit Sunday	June 1	May 20
1st Sunday in Advent	Nov. 30	Dec. 2

The year 1879 is the latter part of the 5639th and the beginning of the 5640th year since the creation of the world, according to the Jews. The year 5640 commences on Sept. 18, 1879, being the 16th year of the 297th cycle of 19 years.

The year 1879 answers to the 6292nd of the Julian Period, to the 2632nd from the foundation of Rome, to the 2655th year of the Olympiads, and to the year 7387-8 of the Byzantine Era.

The year 1297 of the Mohammedan Era commences on Dec. 15, 1879; and Ramadan (month of abstinence observed by the Turks) commences on Aug. 19, 1879.

MOHAMMEDAN CALENDAR FOR THE YEAR 1879.

Year.	Names of Months.	Month begins.
1296.	Saphar	Jan. 25, 1879

PUBLIC ACTS OF PARLIAMENT PASSED IN 1878,

IN THE 41ST AND 42ND YEARS OF HER MAJESTY'S REIGN.

. The figure before each Act denotes the chapter.

1. An Act to apply the sum of £6,000,000 out of the Consolidated Fund to the service of the year ending March 31, 1878.
2. An Act to raise the sum of £6,000,000 by Exchequer Bonds, Exchequer Bills, or Treasury Bills.
3. An Act to relieve certain occupiers of dwelling-houses from being disqualified from the right of voting in the election of members to serve in Parliament by reason of their underletting such dwelling-houses for short terms.
4. An Act to extend the hours of polling at Parliamentary elections in the metropolis.
5. An Act to relieve certain occupiers of dwelling-houses in Scotland from being disqualified from the right of voting in the election of members to serve in Parliament by reason of their underletting such dwelling-houses for short terms.
6. An Act to amend the Glebe Loans (Ireland) Amendment Act, 1875.
7. An Act to raise the sum of £1,000,000 by Exchequer Bonds for the service of the year ending on March 31, 1878.
8. An Act to enable local authorities to acquire and lay out land for public parks and pleasure-grounds in Scotland.
9. An Act to apply certain sums out of the Consolidated Fund to the service of the years ending March 31, 1877-8-9.
10. An Act for punishing mutiny and desertion, and for the better payment of the Army and their quarters.
11. An Act for the regulation of her Majesty's Royal Marine Forces while on shore.
12. An Act for the prevention of accidents by thrashing-machines.
13. An Act to declare the law relating to the acceptance of bills of exchange.
14. An Act to amend the law relating to public baths and washhouses.
15. An Act to grant certain duties of Customs and Inland Revenue, to alter other duties, and to amend the laws relating to Customs and Inland Revenue.
16. An Act to consolidate and amend the law relating to factories and workshops.
17. An Act to amend the Adulteration of Seeds Act, 1869.
18. An Act to grant money for the purpose of loans by the Public Works Loan Commissioners and by the Commissioners of Public Works in Ireland, and to authorise the former Commissioners to compound and cancel certain loans and interest, and to amend the Public Works Loans Act, 1877.
19. An Act to amend the Matrimonial Causes Acts.
20. An Act to provide for returns respecting continuous brakes in use on passenger-trains on railways.
21. An Act to apply the sum of £7,500,000 out of the Consolidated Fund to the service of the year ending March 31, 1879. Consolidated Fund (No. 3) Act.
22. An Act to raise the sum of £1,500,000 by Exchequer Bonds for the service of the year ending March 31, 1879. Exchequer Bonds (No. 2) Act.
23. An Act to remove doubts concerning the due acknowledgment of deeds by married women in Ireland in certain cases.
24. An Act to amend the Public Works Loans (Ireland) Act, 1877, so far as relates to lunatic asylums.
25. An Act to amend the Public Health Act, 1875, so far as relates to the supply of water.
26. An Act to amend the law relating to the registration of voters in Parliamentary boroughs and the enrolment of burgesses in municipal boroughs, and relating to certain rights of voting, and proceedings before and appeals from revising barristers.
27. An Act to amend the Supreme Court of Judicature Act (Ireland), 1877.
28. An Act to further amend the law of entail in Scotland.
29. An Act for conferring powers upon the Metropolitan Board of Works with respect to the obelisk known as "Cleopatra's Needle" and other monuments.
30. An Act to alter the time of electing Commissioners under the General Police and Improvement (Scotland) Act, 1862.
31. An Act to consolidate and amend the law for preventing frauds upon creditors by secret bills of sale of personal chattels.
32. An Act to amend the Metropolitan Management Act (1855), the Metropolitan Building Act (1855), and the Acts amending the same, respectively.
33. An Act to amend the law relating to dental practitioners.
34. An Act to amend the law relating to highways in South Wales.
35. An Act to extend for a further limited period section thirty-four of the Supreme Court of Judicature Act, 1875.
36. An Act to continue for one year the Police (Expenses) Act, 1875.
37. An Act to further amend the Act relating to the raising of money by the Metropolitan Board of Works, and for other purposes relating thereto.
38. An Act for the further relief of innkeepers.
39. An Act for the protection of fresh-water fish.
40. An Act to remove doubts with respect to the application to Scotland of the Prisons Authorities Act, 1874.
41. An Act to enable returning officers at Parliamentary elections in Scotland to require security for their expenses, and otherwise to amend the law of Scotland relating to such expenses.
42. An Act to amend and further extend the Acts for the commutation of tithes in England and Wales.
43. An Act to encourage regular marriages in Scotland.
44. An Act to make provision for the foundation of a Dean and Chapter for the Bishopric of Truro, and for the transfer to the cathedral church of Truro of one of the Canonries in the cathedral church of Exeter, and for other purposes connected therewith.
45. An Act to apply the sum of £14,500,000 out of the Consolidated Fund to the service of the year ending on March 31, 1879. Consolidated Fund (No. 4) Act.
46. An Act to enable her Majesty to provide for the establishment of his Royal Highness the Duke of Connaught and of Strathearn and her Royal Highness Princess Louise Margaret Alexandra Victoria Agnes of Prussia, and to settle an annuity on her Royal Highness.
47. An Act to enable the trustees of the Elders Widows' Fund to apply the capital of the said fund in aid of income, and for other purposes in relation thereto.
48. An Act to amend the law relating to endowed schools and hospitals and other endowed institutions in Scotland, and for other purposes.

49. An Act to consolidate the law relating to weights and measures.
50. An Act to amend the County of Hertford and Liberty of St. Albans Act, 1874.
51. An Act to alter and amend the law in regard to the maintenance and management of roads and bridges in Scotland.
52. An Act to consolidate and amend the Acts relating to public health in Ireland.
53. An Act to facilitate improvements in the organisation of the Admiralty and War Office by the retirement of clerks from certain of the Civil Departments thereof.
54. An Act to amend the Debtors' Act, 1869, and the Debtors' Act (Ireland), 1872.
55. An Act to enable the trustees of the British Museum to remove portions of their collections.
56. An Act to amend the law respecting the expense of regulating commons.
57. An Act for the revision of the statute law of Ireland.
58. An Act for further regulating the use of locomotives on highways in Scotland.
59. An Act to amend the law relating to the drainage and improvement of land in Ireland.
60. An Act to make better provision for idiots, imbeciles, and other afflicted persons in Ireland.
61. An Act to remove doubts as to the validity of certain marriages solemnised in the islands of Fiji prior to their erection into a British colony.
62. An Act to continue certain Turnpike Acts, and to repeal certain other Turnpike Acts; and for other purposes connected therewith.
63. An Act to amend the Prisons Acts of 1877, so far as regards the Apportionment of certain Superannuation Allowances between the Treasury and the Local Authorities.
64. An Act to raise the sum of £2,000,000 by Exchequer Bonds, Exchequer Bills, or Treasury Bills, for the Service of the year ending on March 31, 1879.
65. An Act to apply a sum out of the Consolidated Fund to the Service of the year ending March 31, 1879, and to appropriate the Supplies granted in this Session of Parliament.
66. An Act to promote Intermediate Education in Ireland.
67. An Act for extending and amending the Foreign Jurisdiction Acts.
68. An Act to provide for the foundation of four new Bishoprics in England.
69. An Act to amend the law regulating the Office of Clerk of Petty Sessions, and the law relating to Fines, in Ireland, and for other purposes.
70. An Act to continue various expiring laws.
71. An Act to extend to metropolitan commons certain provisions of the Commons Act, 1876.
72. An Act to prohibit the sale of intoxicating liquors on Sunday in Ireland.
73. An Act to regulate the law relating to the trial of offences committed on the sea within a certain distance of the coasts of her Majesty's dominions.
74. An Act for making better provision respecting contagious and infectious diseases of cattle and other animals, and for other purposes.
75. An Act to amend the law in respect to the polling district of Arranmore (Ireland).
76. An Act to make further provision respecting the Post Office telegraphs.
77. An Act to amend the law relating to highways in England and the Acts relating to locomotives on roads, and for other purposes.
78. An Act to further amend the provisions of the law of Scotland on the subject of education, and for other purposes connected therewith.
79. An Act for further promoting the revision of the Statute Law by repealing certain enactments which have ceased to be in force or have become unnecessary.

PARLIAMENTARY VOTING QUALIFICATIONS.—The persons entitled to the Parliamentary franchise are: (1). The separate occupier of any dwelling-house or premises within the City who is rated to all rates made for the relief of the poor in respect of such premises, and who has on or before July 20 previous to the last revision of the register paid all rates due up to the preceding Jan. 5. (2). The rated occupier of any portion of premises of the clear annual value of £10 who has similarly substantiated his claim. In each place there must be occupation as well as tenancy, and the claimant must have been an inhabitant of the City for twelve calendar months, and must prove that he has resided within twenty-five miles of the City within six months previous to July 31. Distance is measured from the boundary of the City nearest to the place in which the person resides. The overseers are required to publish lists of all persons rated in their respective parishes. (3). Lodgers who have been for twelve months previous to the last day of July the sole tenants of apartments of the net annual value of £10, and who claim to be placed on the list by the overseers before August 25 in the current year. (4). Liverymen who are on the list passed by the revising barrister at the last revision of the electoral register, with the above qualification as to residence within the previous six months. No person can vote more than once in any one election, however many qualifications he may possess.

PARLIAMENTARY CONSTITUENCIES.—A return, issued by order of Parliament, gives the population and constituencies of the counties and boroughs of the United Kingdom in 1871; the number of electors in 1868 and 1877; the area in square miles; the number of members, and the amount of property and Income tax charged for the last year for which the returns were made up. For England and Wales the population in 1871 was 22,712,112; the number of electors in 1868 was 1,991,180, while in the year 1877 they were 2,377,822; the area in square miles, 58,260½; the number of members, 459; and the total amount of property and profits assessed to Income tax for the year ended April 5, 1876, was £440,130,058. For Scotland the population was 3,352,469; the number of electors in 1868, 239,856, and in 1877, 303,933; the area was 30,523½ square miles; the number of members, 60; and the amount of property and Income tax charged was £53,926,912. For Ireland the population in 1871 was 5,412,377; the number of electors in 1868 was 222,454, while in 1877 the number was 227,872; the area in square miles was 32,541½; the number of members was 103; and the amount of property and profits assessed to Income tax was £1,594,557. This gives a grand total for the United Kingdom of a population in 1871 of 31,476,958; the number of electors in 1868, 2,453,490, and in 1877, 2,909,677; an area of 121,325½ square miles; and 652 members of Parliament.

DARBY AND JOAN. BY KATE GREENAWAY.—FROM "THE ILLUSTRATED LONDON NEWS."

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

STRENGTH OF POLITICAL PARTIES IN 1874, AND AT THE END OF THE SESSION, 1878.

THE state of the representation in each of the kingdoms and the Principality is indicated in the table below. Norwich: the Liberals are credited with this seat, as they last held it. Truro, now vacant, is credited to the Conservatives, as it was before held by them.

ENGLAND.

LARNACA, THE MODERN PORT OF CYPRUS.—FROM A DRAWING BY H. HARPER.
FROM "THE ILLUSTRATED LONDON NEWS."

Our Coloured Illustrations.

A TWELVEMOON IN LILLIPUT.

The United Kingdom of Great Lilliput and Dwarfland consists of two islands, quite large enough for all their inhabitants, each of whom is personally small. Their geographical situation in the western seas, off the populous Continent of Ingenua, has enriched the Lilliputians with the profits of maritime trade. Many private fortunes have been accumulated, supporting a highly respectable class of squires and their ladies, whose days are mostly spent in social and domestic pastime. The manners and customs of this harmless folk have recently employed the pencil of a Special Artist. He was enabled, by the enterprising liberality of our proprietors, to furnish the *Illustrated London Almanack* with Sketches made by him during a whole year's residence in that interesting country. Twelve of these, representing the different occupations of leisurely and opulent Lilliputians in successive months of the solar cycle, are reproduced by Messrs. Leighton Brothers in the Colour-Prints of this publication; Mr. George Cruikshank, the younger, is the Artist by whom they were actually drawn.

It will at once be observed that the fashions of dress, in "Lilliput As It Is," bear some resemblance to those which prevailed in England As It Was, under the reign of some one or other of the Four Georges. The fact is, as every person decently instructed in modern history ought to remember, that Lilliput was conquered by the allied English and Hanoverian armies early in the last century. So it was that their Georgian Majesties used sometimes to visit the islands, holding their tedious Court of periwigs and snuffboxes, frills and furbelows, small swords and canes and fans, drinking their dishes of tea, and talking their indispensable scandal, or playing at Faro and Pope Joan, or discussing the merits of a vase, a picture, a pug-dog, a poetical epistle, a soprano singer, or Sir Robert or Sir Paul. Hence it came to pass that the Lilliputian nobility and gentry, male and female, adopted such remarkable costumes; the one sex equipped with huge coat-collars and stuffy neckcloths, tight breeches, Hessian boots, or delicate silk stockings and pumps, and preposterous cocked hats; the other, with bonnets like big dish-covers, surmounted by great bunches of ribbons, feathers, and flowers; short-waisted gowns of stout bombazine or taffeta, none of your flimsy printed stuffs; all the apparel of your great-great-grandmother, if you ever had any such relation. How do you know that you ever had? Look at those funny little folk of our fantastic Lilliput again; they toil not, neither do they spin, but divert themselves in diverse methods during the twelve changeable months of the full revolving year. We can tell you their proper names, their tastes and humours, their mutual friendships, flirtations, jealousies, and quarrels, neighbourly acquaintance in the pleasant country town of Idleville, a fashionable spa of medicinal waters, and a favourite residence of families who want to kill their time and spend their money. It is situated in the midlands of Lilliput, among the leafy oaks and elms of Bankshire, with a easy reach of most of the national sports, and but two hours' railway ride from the mighty metropolis. Idleville has no trade or work but that of studying how to take it easy. Recreation is the local deity, worshipped most devoutly by its appointed priesthood, the votaries of a graceful gentility, to whose wants and wishes the rest of the population have only to minister. A few hundred of the upper class, with incomes of £500 to £2000 a year, are thus punctually waited upon by a few thousand shopkeepers, hotel-keepers, horse-keepers, coach-drivers, servants in and out of livery, tailors, milliners, confectioners, bath and billiard-room keepers, occasional lecturers and musicians; not to mention Dr. Blandy, the assiduous medical attendant; and the Rev. Mr. Chasuble, incumbent of St. Angelina, where High Church services of a superior quality are duly administered on Sunday mornings, and on Wednesday evenings in the Idleville season.

The Lilliputian year, so far resembling the European, begins with the month of January. It is, by another coincidence, apt to be cold in that month. Natural philosophers have observed, as well there as in other climates of the globe, that cold beyond a certain degree has the effect of converting water into ice. The surface of this frozen crust over the rivers and ponds invites to the exercise of skating. For this purpose, we are informed, a peculiar apparatus is contrived, to be worn on the feet; a pair of "skates," as they are called, wooden clogs or sandals, with iron plates attached beneath the soles, enable the skater to glide swiftly and gracefully upon the ice, turning with the slightest effort in any direction. Two couples of Lilliputian gentry, Sir Tim Bilberry and his lady in the foreground of the view, and Mr. and Miss Crimp, of Parsleydale, wheeling off to the right, may be seen in the first Coloured Illustration. We are glad to see Lady Bilberry takes good care of herself by wrapping up well in a furred pelisse, with a sufficient muff and boa, though she will scarcely need the protection of that clumsy umbrella.

It was from Miss Crimp, who is fond of gossip, that we gathered the story of Captain Quinchy's ardent suit to Araminta Silkstone, the great colliery heiress, and the proposal of marriage he brought her, in a Valentine letter with a stuck heart, on the Fourteenth of February. Araminta, you know, was brought up a Quakeress,

though she has gone in for the worldly gaieties since the death of her guardian uncle, Ebenezer Plain. She professed not to know the custom of St. Valentine, or the meaning of hearts and darts, when the letter was presented to her, while she was staying at Lady Bilberry's house. But Miss Crimp is sure that was merely prudish affectation. She observes that the whole system of gallant mythology, from Cupid, whose bust of marble stands in the drawing-room, to the aforesaid symbols of amorous torment which adorn the wall-paper, is constantly on view at Bilberry House. It was impossible for Miss Silkstone to be so ignorant of what every girl and woman knows by instinct from the earliest age of consciousness. And she received a heap of other Valentines on the same day, which Betty was seen to lay upon the pianoforte, beside the young lady's chair, for her deliberate perusal.

The inclemency of much that passes for Spring weather is felt at Idleville as frequently as in any town or village of our own beloved land. The violence of March winds has a disturbing effect on the composure of orderly pedestrians. Sir Tim Bilberry and the ladies of his family, who make a point of walking to church on Sundays, that the coachman and groom may not be obliged to break the Fourth Commandment, have sometimes the Sabbatical starch well-nigh blown out of them at the exposed corner of the wide Market Square. It was there too, as Miss Crimp tells us, that a grand specimen of feminine headgear, the new chapeau à la Tour de Babel, from Madame Folles Filles, of Pump-street, was overthrown by the rude vehemence of a sudden gust. This sumptuous article of apparel, with its muslin and satin appendages of portentous breadth, went sailing through the air, and up the wide archway of the Poultry Market, to the delight of mischievous boys. Sir Tim Bilberry, like a knight of chivalry, bravely pursued the chase and restored the fugitive chapeau to its distressed owner. The ground that day being dry and clean, it may be hoped that her Ladyship's finery was not fatally damaged. More unfortunate was the plight of her visitors, Mr. and Mrs. Whetmore, of Draggleton, when they dined with her on that rainy Tuesday in the third week of April. They had ordered their own carriage to meet them at the Park gate, as it was fine when they started to walk down the avenue; but the man did not come, and they had to trudge home through the lane, under a tremendous shower, by which they were thoroughly soaked. The lady, indeed, had borrowed a pair of patters from Molly Russet, the lodge-keeper's wife, and both were furnished with umbrellas; but it was a most disastrous day, for Mr. Whetmore especially, who got cold from wet feet, having only his stockings and thin pumps, instead of Hessian boots.

"Oh, charming May!" There is a poetic and romantic tradition that this is the month of flowers. Dr. Watts, in his Hymns for Infant Minds, ventures to affirm that the rose is the peculiar glory of April and May. We have not found it so, but May has a few wild flowers of its own, and some of garden culture. The fair and flattered Araminta will deign to accept of a bouquet of such early growth, presented by her polite adorer, with a speech indirectly expressive of his sentiments regarding herself. The shrubbery in his grounds is full of fresh young verdure at this season of the promising year, which finely sets off the fair white marble of the classic satuary and the Grecian colonnade. The elegant owner of this artificial paradise himself affects the grace of a Grecian bend. He is a perfect gentleman of the period; dressed, too, in the most perfect taste, with a morning gown of striped nankeen, a modest shirt-frill and ruffles, and a more than military cocked hat, while the watch-chain and seals at his fob, and his respectable crutched walking-stick, prove the sedateness of his character as a county justice of the peace.

Another scene presents itself in June, when settled Midsummer weather invites some of the nobility to indulge in *al fresco* luncheon, beside the Fountain of Pan, which serves to cool their Liebfraumilch from the Rhine, where the napkin is spread on a stone sarcophagus, once the receptacle of a Senator's or a Proconsul's mortal remains. We have seen, perhaps, in the Villa Borghese Gardens at Rome, or somewhere at Naples, a party of ladies and gentlemen, or it might be a couple on their Italian wedding tour, who contrived to treat themselves with a picnic of this piquant sort, surrounded by the monuments of antiquity and of masterly art. Chicken-and-ham pie is none the worse, or the peaches and nectarines of the sweet south, or the mellow draught of generous wine, for having the feast laid out of doors, under the green trees, at the mimic shrine of a Pagan tutelary deity, supposed to haunt the pleasant grove.

More in agreement, however, with ordinary English customs of life, is the July entertainment of a Regatta, with its yacht-races, and the fashionable company of spectators assembled in the balcony of a Marine Hotel. Here, if anywhere, is the "crème de la crème" of the finest society in the world, attired in the most scrumptious millinery and tailory that heart can desire; and it is to "Le Follet," or "Myra's Journal," or "Le Moniteur de la Chiffonerie," that the reader must refer for a sufficient description. Woman's mission, rightly understood, is to serve as a moving exhibition of costly textile stuffs, on behalf of exorbitant West-End tradesmen. The duty and glory of a fine gentleman is to lounge by her side, and, for his own part, to maintain a consistent profession of Nil Admirari. It is all very well for her to watch the sailing-vessels with a certain degree of interest, and to propose

MAY:—FLOWERS.

JUNE:—A PICNIC.

LEIGHTON, BROS.

THE ORPHAN, BY J. PARKER.
FROM "THE ILLUSTRATED LONDON NEWS."

REMARKABLE OCCURRENCES, &c., 1877-1878.

AUGUST, 1877.

— The Earl of Leitrim, his clerk, and the cardriver, shot dead.

— Belfast election: Mr. Ewart (C) returned.

— Circular despatch published from Lord Salisbury to the British Embassies abroad relating to the treaties of peace.

— Murder of Mr. Ogle, the *Times* correspondent at Volo, in Thessaly.

3. Lord Sandon appointed President of the Board of Trade, Lord George Hamilton Vice-President of the Committee of Council on Education, and Mr. E. Stanhope Under-Secretary for India.

4. The Chancellor of the Exchequer brought up the Budget—Twopence in the pound added to the income tax, the dog license increased to 7s. 6d., and 4d. a pound added to the tax on tobacco.

6. Sir Gilbert Scott buried in Westminster Abbey.

11. Prince Gortschakoff's reply accompanying the annexe to Lord Salisbury's despatch published.

16. Sir C. B. Adderley gazetted to the peerage as Baron Norton.

17. South Northumberland election, double return: Mr. Ridley (C), 2912; Mr. Grey (L), 2912.

— A contingent of about 7000 Indian native troops ordered to proceed to Malta.

— Great strike in the Lancashire cotton trade commenced.

21. Fearful hurricane on the Spanish coast, 300 fishermen drowned.

22. Eighty thousand operatives on strike in Lancashire.

23. Mr. R. W. Hanbury (C) returned for North Staffordshire.

24. The Queen returned to Windsor from Osborne.

— Tamworth election: Mr. Hamar Bass (L), returned, 1186; Colonel Bridgeman (C), 607.

29. First detachment of Indian troops sailed for Malta.

30. City and Suburban won by Sefton.

MAY.

1. Opening of the Paris Exhibition. — Metropolitan Stakes won by Mida.

— Disturbance at Burnley among the cotton operatives on strike.

2. At Sandown Park, the Princess of Wales's Plate won by Caramel.

3. Mr. G. Hardy raised to peerage, by the title of Viscount Cranbrook.

6. The Russian Ambassador had an interview with the Prime Minister. — Successful observations of the transit of Mercury.

7. Foreign Office correspondence respecting Russia and Roumania published.

8. Count Schouvaloff left London for St. Petersburg.

— The Two Thousand Guineas Stakes won by Pilgrimage.

— Trade returns for April showed a decrease of two millions on the imports, and of one million on the exports.

9. Congratulatory address presented to Earl Russell.

10. The One Thousand Guineas Stakes won by Pilgrimage.

11. Attempted assassination of the German Emperor by a Socialist, Hùdel.

15. Renewal of the riots in Lancashire; the Riot Act read at Blackburn, Burnley, Accrington, &c.

— The Chester Cup won by Pageant.

— Viscount Lewisham (C) returned for West Kent.

16. The Queen sanctioned the marriage of the Duke of Connaught with the Princess Louise Margaret of Prussia.

17. Oxford University: Mr. Talbot (C) returned. Reading: Mr. Palmer (L) returned, 2223.

21. Congress on the National Water Supply.

24. Henry George King, wholesale chemist, charged at Epping with having sold violet powder containing arsenic, by which deaths and much illness had been caused.

28. Death of Earl Russell.

29. Severe fighting with Kaffirs reported.

30. The Voltaire Centenary celebrated in France.

— The Hon. and Rev. Ward Carr Glyn appointed Vicar of Kensington.

— An understanding between the British and Russian Governments signed at the Foreign Office.

31. The Government offer of a public funeral in Westminster Abbey for the late Earl Russell refused.

— The German ironclad Grosser Kurfürst sunk after collision off Folkestone. Upwards of 300 lives lost.

JUNE.

2. The German Emperor shot at and wounded by Dr. Nobiling, a Socialist.

3. Ministers accepted an invitation to the Berlin Congress to discuss the whole Treaty of San Stefano. Lord Beaconsfield and Lord Salisbury Plenipotentiaries.

4. All the European Cabinets accepted the invitation to the Congress.

5. The Derby won by Sefton.

7. Upwards of 200 lives lost by an explosion in the Woodbit Colliery, near Wigan.

— The Oaks won by Jannette.

— The award for the purchase of Waterloo Bridge announced at £475,000.

11. Lord Beaconsfield arrived in Berlin, and had a conference with Prince Bismarck.

12. Death of King George of Hanover.

— The Manchester Cup won by Attalus.

13. The Congress in Berlin opened.

14. Southampton: Mr. Giles (C), 2552; returned.

— Rochester: Mr. Otway (L), 1284; returned.

— Text of the Anglo-Russian Agreement published.

18. Banquet to commemorate the repeal of the Test and Corporation Acts.

19. The Berlin Congress decided to admit Greece to a consultative voice in questions affecting Greek interests.

— The Royal Hunt Cup at Ascot won by Julius Caesar.

JULY:—A REGATTA.

AUGUST:—HARVEST.

LEIGHTON, BROS.

NORTH COAST VIEW, FROM ST. HILARION, OF THE MOUNTAIN CHAIN OF KYRENIA, CYPRUS.
FROM "THE ILLUSTRATED LONDON NEWS."

THE POPULATION OF THE EARTH.

We learn from Behm and Wagner's statistical work on the population of the earth that the estimate of population of the globe for the past year amounted to 1,423,917,800, and the area of the land surface they calculate to be 51,340,000 square miles, thus giving an average density of about 28 people to one square mile. These data are apportioned among the various divisions of the globe as nearly as possible as follows:—

	Square Miles.	Inhabitants.	Density per Square Mile.
Europe	3,776,493	309,178,300	82
Asia	17,079,383	824,548,500	48
Africa	11,415,894	199,921,600	17½
Australia and Polynesia ...	3,381,210	4,748,600	1-1-3
America	15,687,840	85,519,800	5½

It is stated that the area of the land surface of the globe has decreased in a year as much as 83,349 square miles. This decrease mainly affects America, and may be attributed to the result of a more accurate and extended survey of the United States. In all the other divisions of the land surface, however, the area is given as less than the previous year, and this has had the effect, along with the absolute increase of the population, of slightly raising the density per square mile. The increase of the population is estimated in a year as upwards of 27,000,000.

The following are the populations of the various States of Europe, according to latest estimates:—

Germany, 1875	42,723,242	Spain, 1870	16,551,647
Austria-Hungary, 1876 ...	37,700,000	Andorra	12,000
Switzerland, 1870	2,669,147	Portugal, 1874	4,298,881
Netherlands, 1875	3,809,527	Italy, 1875	27,482,174
Belgium, 1874	5,336,634	Monaco, 1873	5,741
Luxemburg, 1875	205,158	San Marino, 1874	7,816
Russia, 1870	71,730,980	Turkey, entire population	31,000,000
Sweden, 1875	4,383,291	Roumania, 1873	5,073,000
Norway, 1875	1,802,882	Servia, 1875	1,377,068
Denmark, 1876	1,903,050	Montenegro	190,000
France, 1872	36,102,921	Greece, 1870	1,457,894
Great Britain, 1876	33,450,000		

The dates indicate the years in which the data were obtained on which Behm and Wagner have based their estimate. In the case of Great Britain, of course, the estimate is founded on the returns of the Registrar-General, for there has been no formal census, with a census once every ten years. Since 1871 the population of Germany has increased by 1,693,762. There seems to have been a census taken in Norway in January of the present year, the details of which have not been published, though Behm and Wagner give the probable total as 1,815,000, an increase of about 12,000 on the estimate for 1875. The increase in the case of Great Britain over the estimate for 1875 is 352,000. Portugal shows an increase of about 310,000 since 1871, and, if the population of the Azores and Madeira be added, it will raise the number in the table by 378,681. The population of Turkey proper is given as 8,500,000; Roumania, 4,459,277; and Servia, 1,377,068, a little over one third being Mohammedans. The population of the whole of the Turkish empire in Europe, Asia, and Africa is given as 47,660,000, 20,500,000 being claimed by Egypt, Tripoli, and Tunis, and 13,000,000 by Asia. The total population of Russia, both in Europe and Asia, is set down as 86,586,000, being an increase of 900,000 over the estimate for 1875. As might be surmised, this increase is mainly in Central Asia, and arises from additions to territory. The area given for the whole of the Russian empire is 8,456,500 square miles, being an increase of 26,000 square miles over that of 1875. This increase has occurred mainly in Central Asia, where the Russian territory covers an area of about 1,290,000 square miles, with a population of 4,650,213.

The entire population of Asia is larger by about 25,000,000 than the estimate given in last year's issue of Behm and Wagner's work. The increase mainly falls upon the East India Islands and Annam, the figures in the case of the latter being more than double those given in the tables of last year—viz., 21,000,000. The population of British India is rather less than last year, being 188,093,700, that of British Burmah being about 2,750,000; including tributary or protected States. The whole population of British India is close on 239,000,000.

The population of China is given as 405,000,000, with 28,500,000 of outlying people. Hong-Kong seems to have decreased by upwards of 2000 since last year, the number now given being 121,985. Japan is set down at 33,299,014.

According to late statistics, the whole population of Australia amounts to 1,867,000; of New Zealand to 421,326. In the Fiji Islands the native population seems to be rapidly decreasing. It is calculated now not to exceed 70,000, while the whites, who in 1872 numbered 2940, were last year only 1650.

With regard to Africa, the population of Algeria was in 1875 estimated to be 2,448,961. The population of Egypt shows a slight increase over last year, being now 17,000,000. The inhabitants of Port Said now number 9650, and of Ismailia 3779. The British possessions in South Africa show an increase of territory and population, the latter numbering according to latest data, 1,338,702.

There is an increase over the whole of America of upwards of 1,200,000 over the number given last year. This increase seems to a considerable extent due to the fact that more recent statistics have been obtained since last year, the data in many instances referring to 1875 and 1876. The population of Newfoundland—e.g., is that of 1874, and is 161,386, showing a large increase over that of 1869. Canada is still 3,672,116, and the United States nearly 40,000,000. Mexico stands at 9,276,079, and this must be from quite recent data, as last year's number was that of 1872. The Central American States show a slight decrease, the number this year being 2,828,164; the West Indies, 4,316,178, and all South America 26,309,700, of which Brazil claims upwards of 11,000,000.

About 215 towns contain 100,000 or more inhabitants. There are twenty-nine towns whose population reaches or surpasses 500,000. Those at or above a million are—Berlin, 1,045,000; Canton, 1,000,000; London (1876), 3,489,428; New York with Brooklyn (1875), 1,535,622; Paris, 1,831,792; Seanting, Shanchowfu, and Singanfu (China), each 1,000,000; and Vienna, 1,001,999.

The entire area of British possessions abroad is given at 7,964,752 square miles, with a population of 203,941,766, excluding, of course, the protected Indian States. The average increase of population is largest in

England. While its birth-rate is not so high as that of some other States, its death-rate is among the lowest. It seems probable that at the end of the present century the population of England and Wales will have risen to 30,000,000. Next in rank in respect to increase of population come Sweden and Denmark, both with a moderate birth-rate, but an exceedingly low death-rate, that of Denmark being the lowest of any of the nine States. The population of Sweden might be expected to rise to about 5,500,000 by the end of the century, and that of Denmark to 2,250,000. Next in order stood Prussia, which has a very high birth-rate and a very high death-rate, which latter, however, is steadily decreasing, and the population of Prussia might be expected to be about the same as England at the end of the century. It is known that the population of the other German States did not increase so much as in Prussia, but it might be fairly calculated that the great Empire of Central Europe would have about 50,000,000 in the year 1900. The Netherlands stood fifth in the list as to increase, with a birth-rate nearly equal to England, but a much higher death-rate, and the population will probably be 5,000,000 by the end of the century. These five States, England, Sweden, Denmark, Prussia, and the Netherlands—all, it will be noted, inhabited by Teutonic races—virtually comprised all out of the nine in which there was a tendency to marked increase of population. In three more, Austria, Spain, and Italy, the birth-rate is high, but the death-rate is still higher, with a tendency even to mount upwards, and the growth of population, therefore comparatively slow. Still Austria and Italy might both be expected to add about 1,500,000 to their respective populations before the century had run out, and Spain nearly 1,000,000. The only country among the nine enumerated—and probably the only State of Europe—showing scarcely any increase of population whatever is France. As exhibited in the figures of one of the tables giving the average annual birth-rates and death-rates, these were not very far from equal. The returns for the twenty-two years from 1833 to 1874—a period including some years of disaster, but likewise many years of the highest material prosperity, such as the country scarcely ever before knew—gave the average annual birth-rate at 26·1 per 1000 of the population, while the annual death-rate was 24·2 per 1000. Thus the excess of birth-rate over death-rate in France was not more than 1·9 per 1000, while in England it was 12·7 per 1000. At the same time, the average annual marriage-rate of France was above that of Italy, Spain, Sweden, and the Netherlands, and very nearly as high as that of England and Wales.

THE POPULATION OF TURKEY.

THE Turkish census is of a very imperfect character, owing to the fact that the Government returns exclude not only all adult women but also non-adults of both sexes. The age at which boys in Turkey become liable to tribute is eighteen for Muslims, and twelve or thirteen for non-Muslims. By the treaty of Berlin certain provinces of the Danube and Bosnia have been lost to the Sultan. The population of the province of the Danube as last given was 907,714, which, when made to include women and children, would give a total of 2,723,322; that of Bosnia, 2,829,384. Sofia, 213,180; Nish, 237,000; and, together with Shehr-Kijavi, 200,000: when it is added, these give a total of 1,950,540. Grand total of losses, 7,503,296. The further losses of Roumania, 5,073,000; Servia, 1,366,923; Montenegro, 185,000; total, 6,524,923; bring up the Turkish loss to 14,000,000; and if to this the loss of East Roumelia, 1,000,000, be added it will give a total of 15,000,000. The population of Turkey in Asia is estimated at 24,000,000, but this is exclusive of Arabs and Egyptians. The district ceded to Russia in Asia, consisting of one half of the country of Lazistan or Batoum, that is of about 35,000 males; and that of Childir and Kars, 84,632, gives an additional total of 360,000 souls, nearly all Muslims, and deducts another 500,000 of the Sultan's subjects, most of whom are of Turkish race and speech.

The population of the Island of Cyprus is given at 21,700 adult males, which means about 65,000 in all. The entire estimated population still stands at a total of 31,000,000 exclusive of the African dependencies. The Turks now number 12,000,000; Arabs, 9,000,000; Armenians, 2,000,000; Greeks, 2,000,000; Albanians, 2,000,000; Kurds, 1,000,000; and, mixed, Christians, Jews, Muslims, Turkomans, &c., 3,000,000.

POPULATION OF TURKEY, 1878, BEFORE THE WAR.

GREAT AMERICAN COUNTRIES.—Hitherto little or no account has been given of any other part of America than the United States, but a table is now introduced giving some few particulars relating to the chief countries of America. The area of the United States is put at 3,603,800 square miles, and the population at 40,000,000 souls. Canada, 3,512,268 square miles, and 3,718,745 population; Brazil, 3,218,166 square miles, and 10,700,187 population; the Argentine Republic, 1,619,463 square miles, and 2,250,000 population; Mexico, 743,713 square miles, and 9,343,470 population; Columbia, 726,384 square miles, and 3,000,000 population; Peru, 642,976 square miles, and 3,199,000 population; Bolivia, 507,598 square miles, and 2,000,000 population; Venezuela, 403,155 square miles, and 1,800,000 population; Chili (exclusive of Patagonia), 122,939 square miles, and 2,068,424 population. The other countries are smaller and less populous.

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

BANK OF ENGLAND.

Founded, 1694. Capital, £14,563,000.

THREADNEEDLE-STREET, CITY. | BURLINGTON-GARDENS, W.
Governor, E. H. Palmer. Deputy Governor, J. W. Birch.

Directors.

H. W. Blake	B. B. Greene	J. L. Holland	A. Matheson
H. H. Berens	H. R. Grenfell	J. G. Hubbard	J. James Morris
H. Brooks	H. H. Gibbs	Thos. N. Hunt	D. Powell, jun.
R. W. Crawford	John S. Gilliat	C. F. Huth	A. C. de Rothschild
M. W. Collet	C. H. Göschen	George Lyall	A. G. Sandeman
J. P. Currie	T. Hankey	W. Lidderdale	C. Weguelin

Chief Accountant, John Francis.
Secretary, H. Chubb.

Chief Cashier, Frank May.
Solicitors, Messrs. Freshfield.

TRANSFER DAYS AT THE BANK.

All Stocks on Tuesdays, Wednesdays, Thursdays, and Fridays. Private Transfers may be effected at other times, providing the books are not closed, by paying 2s. 6d. for each Transfer. Tickets for preparing the Transfer of Stock must be given in at the Bank of England before one o'clock. Expenses of Transfer in Bank Stock for £25 and under, 9s.; above that sum, 12s.; India Stock, £1 10s.

Powers of attorney for the sale or transfer of Stock are to be left at the Bank, &c., for examination, one day before they can be acted upon; if for receiving dividends, they may be presented at the time the first is payable.

Probates of Wills, Letters of Administration, and other proofs of decease must be left at the Bank, &c., for registration, for two or three days.

If Life Annuities be transferred between Jan. 5 and April 4, or between July 5 and Oct. 4, dividends are payable on Jan. 5 and July 5. If transferred between April 5 and July 4, or between Oct. 5 and Jan. 4, dividends are payable on April 5 and Oct. 5. Transferred at the National Debt Office, Old Jewry.

The dividends are paid to the public three days after the dates named; if a Sunday intervene, four days after. The hours for buying and selling are 10 to 1; for transferring, 11 to half-past 2; for accepting, 9 to 3; for payment of dividends, 9 to 3. Transfer-books are closed at 1 p.m. on Saturdays.

Dividend Warrants issued as follows:—1. To the fundholder personally at the Bank of England. 2. Under Power of Attorney, free of stamp duty or any other charge. 3. By post within the United Kingdom.

Fundholders who desire to have their Dividend Warrants sent by post must fill up a form, obtainable at the Bank of England or its branches, and at all money-order offices. For joint accounts, all the parties in whose names the fund stands must sign in favour of the one to whom the warrant is to be sent. Post warrants will be crossed "and Co.," and can be cashed at any money-order office, or paid away as ordinary bankers' cheques. Notice should be given to the Bank of the non-reception of any warrant which has been directed to be sent by post.

Under the provisions of an Act passed in 1871, the following are the dividend days and periods of redemption of the various Stocks:—

Denomination.	Half-Yearly Dividend.	Period of Redemption.
Consolidated Three per Cent Annuities	{ January 5 ... July 5 ..	Any time after passing of Act, agreeably to the regulation therein.
Reduced Three per Cent Annuities	{ April 5 ... October 5 ..	
New Five per Cent Annuities	{ January 5 ... July 5 ...	Any time after Jan. 5, 1873.
New Three per Cent Annuities	{ April 5 ... October 5 ..	Any time after Oct. 10, 1874.
New Three-and-a-Half per Cent Annuities	{ January 5 ... July 5 ...	Any time after Jan. 5, 1894.
Two-and-a-Half per Cent Annuities	{ January 5 ... July 5 ...	Any time after Jan. 5, 1894.

Twining, R., and Co., 215, Strand.
Union Bank of Australia, 1, Bank-buildings, Princes-street.
Union Bank of London, 2, Princes-street, City; 66, Charing-cross; 14, Argyll-place, Regent-street; Chancery-lane; and Holborn-circus.
Williams, Deacon, Labouchere, and Co., 20, Birchin-lane.

The Bankers' Clearing-House, near the Post Office, Lombard-street, is the medium through which bankers obtain the amount of cheques and bills in their hands for collection from other bankers. Every bank in London and the country is represented by clearing bankers; and, as their agents send through the clearing-house draughts payable in the City and in the country, the amount passing through this channel is enormous.

DUST-STORM. CENTRAL ASIA.
FROM "THE ILLUSTRATED LONDON NEWS."

POST OFFICE REGULATIONS.

RATES OF POSTAGE ON INLAND LETTERS.

The rates of postage to be prepaid are as follow, viz:—

For a letter not exceeding 1 oz.	1d.
Exceeding 1 oz., but not exceeding 2 oz.	1½d.
„ 2 oz., and less than 4 oz.	2d.
„ 4 oz., and less than 6 oz.	2½d.
„ 6 oz., and less than 8 oz.	3d.
„ 8 oz., and less than 10 oz.	3½d.
„ 10 oz., and less than 12 oz.	4d.

A letter exceeding the weight of 12 oz. is liable to a postage of 1d. for every ounce, beginning with the first ounce. A letter, for example, weighing between 14 oz. and 15 oz. must be prepaid 1s. 3d.

All inland letters must be prepaid in stamps. A letter posted unpaid is chargeable on delivery with double postage; and if insufficiently prepaid is chargeable with double the deficiency.

GENERAL POSTAL UNION.

In accordance with the provisions of an international treaty concluded at Berne in 1876, the whole of the States of Europe, the United States of America, the Argentine Confederation, and Egypt were formed into a General Postal Union for the reciprocal exchange of correspondence, and adopted low and uniform rates of correspondence dispatched from one State to another. These provisions extend to letters, post cards, newspapers and other printed papers, patterns of merchandise, and legal and commercial documents.

COLONIAL AND FOREIGN LETTERS.

The rates of postage on letters to the colonies and foreign countries will be found in the British Postal Guide, published quarterly, price Sixpence.

To some countries prepayment of the postage is compulsory. In other cases the whole of the postage cannot be prepaid.

A letter posted unpaid, or paid only in part, directed to go by a route by which prepayment is compulsory, is sent to the Returned Letter Office, to go back to the writer, unless there is another route by which prepayment is not required, in which case the letter is sent by the latter route. Letters, however, for Australia and New Zealand, if prepaid as much as one rate (even though the prepayment be insufficient), are not detained, but are forwarded charged with the deficient postage and an additional rate.

A letter posted insufficiently prepaid for a place to which prepayment is optional is sent forward charged; the value of the stamps, however, being, as a rule, taken into account.

The same rates are chargeable in this country upon unpaid or insufficiently paid letters received from the above-named places.

No letter for any colony or foreign country may be above two feet in length or one foot in width or depth.

Letters, &c., for Brazil, Montevideo, Peru, Bolivia, and Chili, if specially directed "By Supplementary Mail, via Bordeaux," and posted in time for dispatch from London by the Day Mail of Friday, will in due course overtake, at Bordeaux, the packet dispatched from Liverpool on the previous Wednesday.

Letters for such places in Turkey and Asia Minor as have no Austrian post office should be addressed to the care of an agent residing in the nearest port at which an Austrian post office has been established. Letters for places on the Persian Gulf are forwarded via Bombay, if specially directed by that route and prepaid the rates of postage for Bombay.

Letters for Russia should have the name of the town added in either English, French, or German; and they should bear as a part of their address the name of the province or government in which they are situated. In addressing all letters, &c., for Russia the name of the place of destination, as well as the government in which such place is situated, must be correctly given; and, further, the address must be plainly written. If these conditions be not complied with, the Russian Post Office declines to undertake the delivery of the correspondence.

No letters containing gold or silver money, jewels, or precious articles, or anything liable to Customs duties, can be sent, even if registered, to any country of the General Postal Union.

INLAND BOOK POST.

The postage is one halfpenny for every 2 oz. or part of that weight.

A packet posted wholly unpaid is charged with double the book postage; and if posted partially prepaid, with double the deficiency.

A book packet may contain any number of separate books or other publications, photographs (when not on glass or in cases containing glass or any like substance), drawings, prints, or maps, and any quantity of paper, or any other substance in ordinary use for writing or printing upon; and the books or other publications, prints, maps, &c., may be either printed, written, engraved, lithographed, or plain, or any mixture of these. Further, all legitimate binding, mounting, or covering of a book, &c., or of a portion thereof, is allowed, whether such binding, &c., be loose or attached; as also rollers in the case of prints or maps, markers (whether of paper or otherwise) in the case of books, pens, or pencils, in the case of pocket-books, &c.; and, in short, whatever, is necessary for the safe transmission of such articles, or usually appertains thereto, but the binding, rollers, &c., must not be sent as a separate packet.

COLONIAL AND FOREIGN BOOK POST.

The limit of size for a book-packet addressed to any place abroad is 24 in. in length and 12 in. in width or depth.

Whatever is allowed to be sent in an inland book-packet may be sent in a book-packet to places abroad, except that water-colour drawings are not allowed to be sent in a book-packet to France or Algeria.

No writing or manuscript mark, however, beyond the name and address of the person to whom it is sent is admissible in or upon a packet forwarded via France to the Argentine Confederation, Bolivia, Chili, Ecuador, Hayti, Mexico, Paraguay, Peru, St. Thomas, Uruguay, United States of Colombia, or Venezuela.

INLAND CARD POST.

A single post-card, or any number of post-cards—whether "stout" or "thin"—may be purchased. The prices respectively are as follows:—Stout cards: one, 3d.; two, 1½d.; three, 2d.; four, 2½d.; five, 3d.; six, 4d. Thin cards: one, 3d.; two, 1½d.; three, 1½d.; four, 2½d.; five, 3d.; six, 3½d.

FOREIGN CARD POST.

Foreign post-cards may be sent to Canada and to all the countries comprised in the General Postal Union, with the exception of British India.

The postage of a card is in every case one half the rate for a single letter. Foreign post-cards with an impressed stamp of 1½d. each are sold at that rate, and are transmissible to the majority of the countries of the Union without extra charge.

INDIAN PARCEL POST.

1. Persons wishing to send parcels to any part of British India can do so through the Indian Parcel Post Agency—established under authority of the Director-General of the Post Office of India—at 122, Leadenhall-street, E.C.; and (Branch Office) at 25, Cockspur-street, S.W.

2. The charge for parcels is 1s. per lb. or fraction of a lb. (prepayment optional), covering transit from London to destination in India. Insurance may be effected, if desired, at the rate (to be prepaid) of 1s. up to £3 value, 2s. 6d. up to £10 value, and 5s. up to £20 value. Indian Customs duty (if chargeable) will be realised from the addressee.

N.B.—Parcels containing books, or articles treated as books under the British Inland Book Post Rules, will be charged at half rates—viz., 6d. per lb.

COLONIAL AND FOREIGN PATTERN AND SAMPLE POST.

There is a Pattern and Sample Post to certain colonies and foreign countries, but it is restricted to bona fide trade patterns or samples of merchandise.

Goods sent for sale, or in execution of an order (however small the quantity may be), or any articles sent by one private individual to another which are not actually patterns or samples, are not admissible. The rates of postage are the same as for Book Packets.

POST OFFICE SAVINGS BANKS AND INSURANCE.

There is a Post Office Savings Bank in every town and in most villages, and at most savings banks there is an Insurance and Annuity Office. A list of them is kept at all post offices.

LETTERS "TO BE CALLED FOR."

There is a Poste Restante both at the General Post Office, St. Martin's-le-Grand, and at the Charing-cross Post Office, where letters "to be called for" can be obtained between the hours of nine a.m. and five p.m. There is also a Poste Restante at Woolwich, available during the ordinary hours of business. No letters (except communications from the Savings Bank Department) are taken in "to be called for" at the other district or branch offices, and any so directed are sent to the Returned Letter Office to be returned to the writers.

The Poste Restante being intended solely for the accommodation of strangers and travellers who have no permanent abode in London, letters for residents must not be addressed to the Post Office "to be called for;" and any letters for a resident so addressed, although detained at the Post Office for one week, are, after that time, sent out by the letter carriers. Even strangers are not, as a rule, allowed to use the Poste Restante for more than two months; at the end of which time they are expected to have their letters sent to a private address.

Letters addressed to initials or to fictitious names at the Poste Restante are not taken in, but are at once sent back to the writers.

ARTICLES NOT ALLOWED TO BE SENT BY POST.

It is forbidden to forward by post any indecent or obscene print, painting, photograph, lithograph, engraving, book or card, or other article, or any letter, newspaper, publication, packet, or card having thereon any words, marks, or designs of an indecent, obscene, libellous, or grossly offensive character. Anything posted contrary to this prohibition will be stopped and sent up to the Returned Letter Office, London.

Postmasters are instructed not to receive any letter which there is good reason to believe contains anything likely to injure the contents of the mail bag, or to do bodily harm to any officer of the Post Office. If such a packet be posted without the Postmaster's knowledge, or if at any time before its dispatch he should discover any such packet, he is directed not to forward it, but to report the case, with the address of the packet, to the Secretary. The following are examples of the articles referred to:—

A glass bottle, or glass in any form; leeches, game, fish, meat, fruit, or vegetables; bladders or other vessels containing liquids; gunpowder, lucifer matches, or anything which is explosive or liable to sudden combustion; razors, scissors, needles, forks, or other sharp instruments.

MODES OF PREPAYMENT.

Inland letters, newspapers, and book-packets cannot be prepaid in money but must be prepaid by means of stamps, either adhesive or embossed or impressed. This rule applies also to registered letters.

Exceptions.—At the Chief and District Post Offices, and at the Charing-cross and Lombard-street Post Offices in London, as well as at the Head Offices in Edinburgh and Dublin, letters and book-packets may, from 10 a.m. to 4 p.m., be prepaid in money, provided the amount be never less than £1, and that the letters and book-packets be tied in bundles representing a postage of 6s. each, with the addresses arranged in the same direction.

Letters to places abroad must be prepaid wholly in stamps.

Newspapers, book-packets, and sample-packets for places abroad can also be prepaid only by means of stamps; and in their case prepayment is always compulsory.

British postage-stamps, though available for all letters, &c., going out of this country, are not, as a general rule, available for letters, &c., coming into it; the principal exception being in the case of letters posted by naval officers, marines, and seamen serving abroad, which, if posted in the ship's bag, must be prepaid by means of British postage-stamps.

REGISTRATION (INLAND AND FOREIGN.)

The fee for registering a letter, newspaper, or book-packet passing between any two places in the United Kingdom is fourpence.

The fee chargeable for registration to places abroad will be found in the British Postal Guide.

Every letter to be registered should be presented at the counter, and a receipt obtained for it, and should on no account be dropped into the letter-box. If, contrary to this rule, a letter marked "Registered" be dropped into the letter-box, it will, if directed to any place in the United Kingdom or the British Colonies, be liable to a registration fee of 8d., instead of the ordinary fee of 4d.

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

ASTRONOMICAL OCCURRENCES IN THE YEAR 1879.

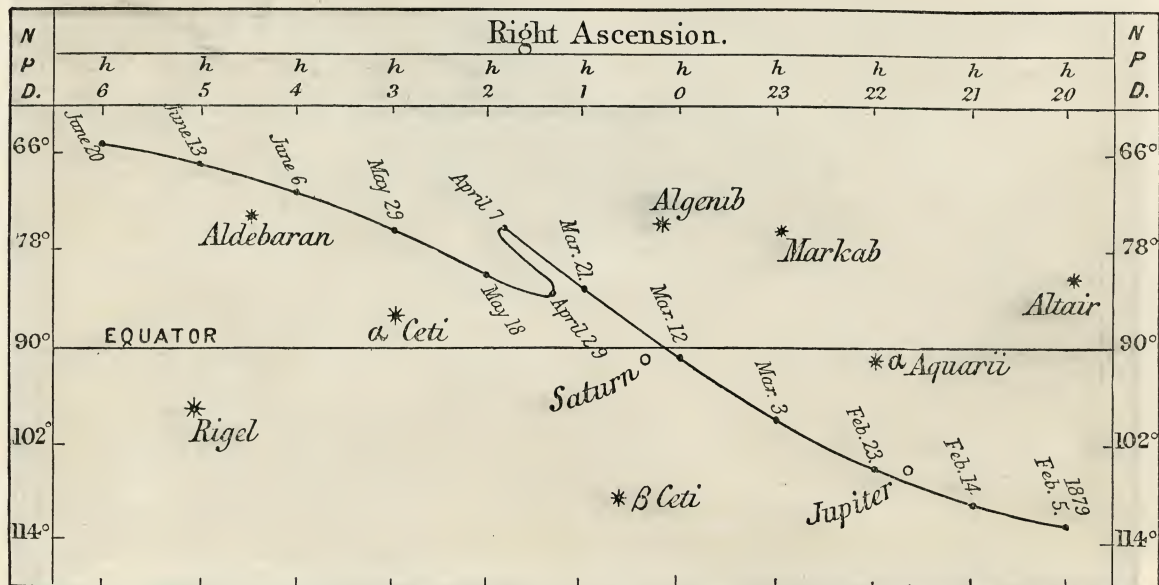

JANUARY.

THE MOON is very near Mars on the morning of the 19th, the closest approach will be at 6h. a.m., when Mars will be situated a little north of the Moon. She is near Mercury on the morning of the 20th. On Jan. 22 the Moon is near both Venus and Jupiter, being situated to the right of both these planets, Venus being situated between Jupiter and the Moon; the Moon on this day sets at 4h. 36m. p.m. She is also very near them on the evening of the next day, being situated to the left of both; the higher of the

two planets is Jupiter. On this day the Moon sets at 5h. 54m., Venus at 5h. 3m. p.m., and Jupiter at 5h. 39m. p.m. During the evening of the 26th and 27th she is near Saturn, being to the right of him on the former, and to the left on the latter evening. Her phases or times of change are:—

Full Moon on the 8th at 48 minutes after 11h. in the morning.
Last Quarter „ 15th „ 2 „ 11 „ morning.
New Moon „ 22nd „ 51 „ 11 „ morning.
First Quarter „ 30th „ 45 „ 11 „ morning.

She is at her greatest distance from the Earth on the 1st, and again on the 29th, and at her least distance from it on the 14th.

Path of Mercury from February 5, 1879; to June 20, 1879.

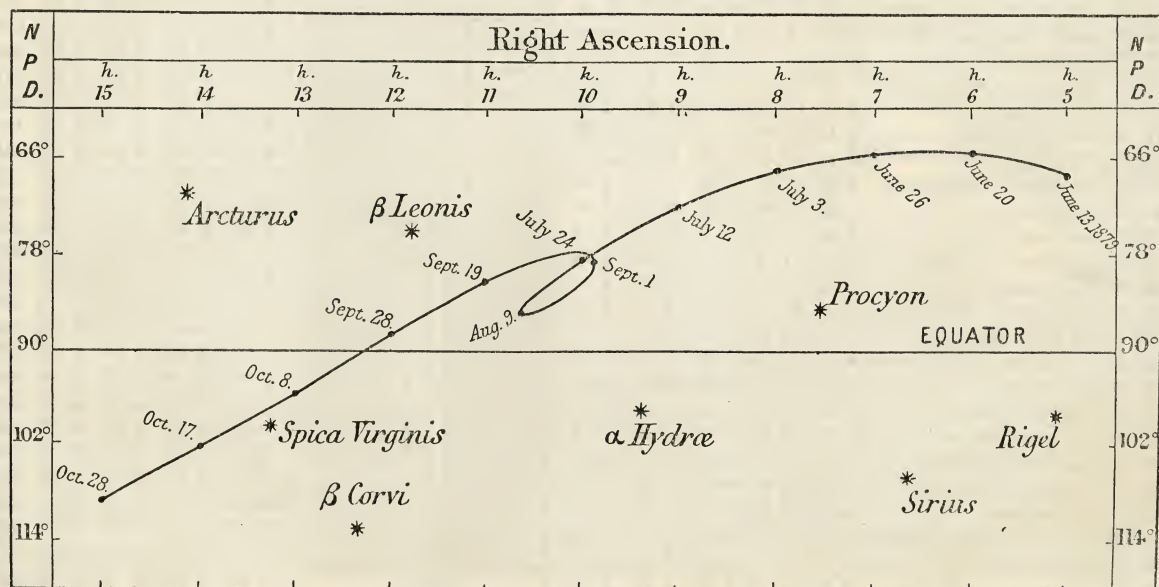

MERCURY is a morning star, rising on the 1st at 6h. 51m., or 1h. 17m. before the Sun; on the 11th he rises at 6h. 20m., or 1h. 45m. before the Sun; from this day the interval between the rising of this planet and the Sun decreases. On the 16th he rises at 6h. 25m., or 1h. 35m. before the Sun; on the 21st at 6h. 33m. a.m.; and on the last day at 6h. 50m., or 53 minutes before the Sun. He is stationary among the stars (see diagram) on the 5th, at its greatest western elongation (24 deg. 0 min.) on the 16th, near the Moon on the 20th, and in his descending node on the 25th.

VENUS is an evening star, setting on the 1st at 4h. 26m., or 26 minutes after sunset, this interval increases to 41 minutes by the 11th, to 56 minutes

on the 21st, and to 1h. 10m. on the last day, on which day she sets at 5h. 56m. p.m. She is at her greatest distance from the Sun on the 10th, near the Moon on the 23rd, and near Jupiter on the 24th.

MARS is a morning star, rising on the 1st at 5h. 24m. a.m., or about 2h. 45m. before the Sun; he rises on the 11th at 5h. 22m. a.m., on the 21st at 5h. 18m., and on the last day at 5h. 12m. a.m., or 2½ hours before sunrise. He is in his descending node on the 10th, and near the Moon on the 19th. He is due south on the 1st at 9h. 31m. a.m., on the 15th at 9h. 15m. a.m., and on the last day at 9h. 4m. a.m.

(Continued on page 40.)

Path of Mercury from June 13, 1879; to October 28, 1879.

SEPTEMBER:—PARTRIDGE SHOOTING.

OCTOBER:—LAST DAY ON THE RIVER.

LEIGHTON, BKUS.

A MYTHOLOGICAL INCIDENT.
FROM "THE ILLUSTRATED LONDON NEWS."

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

(Continued from page 37.)

JUPITER is an evening star, setting on the 1st at 6h. 37m. p.m., or 2h. 37m. after the Sun; he sets on the 11th at 6h. 10m. p.m., on the 21st at 5h. 44m. p.m., and on the last day at 5h. 19m. p.m., or 33 minutes after the Sun. He is near the Moon on the 23rd. He is due south on the 1st at 2h. 10m. p.m., on the 15th at 1h. 28m. p.m., and on the last day at 0h. 40m. p.m.

SATURN is an evening star, and sets at 10h. 56m. p.m. on the 1st, at 10h. 21m. on the 11th, at 9h. 46m. on the 21st, and at 9h. 13m. p.m. on the last day. He is near the Moon on the 27th. He is due south on the 1st at 5h. 9m. p.m., on the 15th at 4h. 18m. p.m., and on the last day of the month at 3h. 20m. p.m.

FEBRUARY.

THE MOON is near Mars on the morning of the 16th, being situated to the right of the planet. She is also near him on the morning of the 17th, then being on the left of the planet, the distance being greater than on the preceding morning. She is near both Jupiter and Mercury on the 20th; but it is the day before new moon, and all are near the Sun. She is near Venus on the 22nd, being to the right of the planet; and she is to the left of this planet on the evening of the 23rd; on this evening she is very near to and to the right of Saturn. Her phases or times of change are:—

Full Moon on the 7th at 42 minutes after 1h. in the morning.	
Last Quarter " 13th " 53 " 6 " afternoon.	
New Moon " 21st " 3 " 4 " morning.	

She is nearest the Earth on the 9th, and most distant from it on the 25th. MERCURY is a morning star at the beginning of the month, but not favourably situated for observation. On the 5th he rises at 6h. 57m., or 35m. before the Sun; on the 10th at 7h. 1m., and on the 24th at 6h. 59m., being at the same time as the Sun; and from this day till April 10 this planet rises after the Sun, or in daylight. He is at his greatest distance from the

Sun on the 5th, near Jupiter on the 20th, and near the Moon on the same day.

VENUS is an evening star, setting on the 10th at 6h. 30m. p.m., or 1h. 28m. after the Sun. This interval increases night by night to 1h. 41m. on the 20th, and to 1h. 51m. on the last day. The planet setting on this day at 7h. 27m. p.m. She is near the Moon on the 23rd.

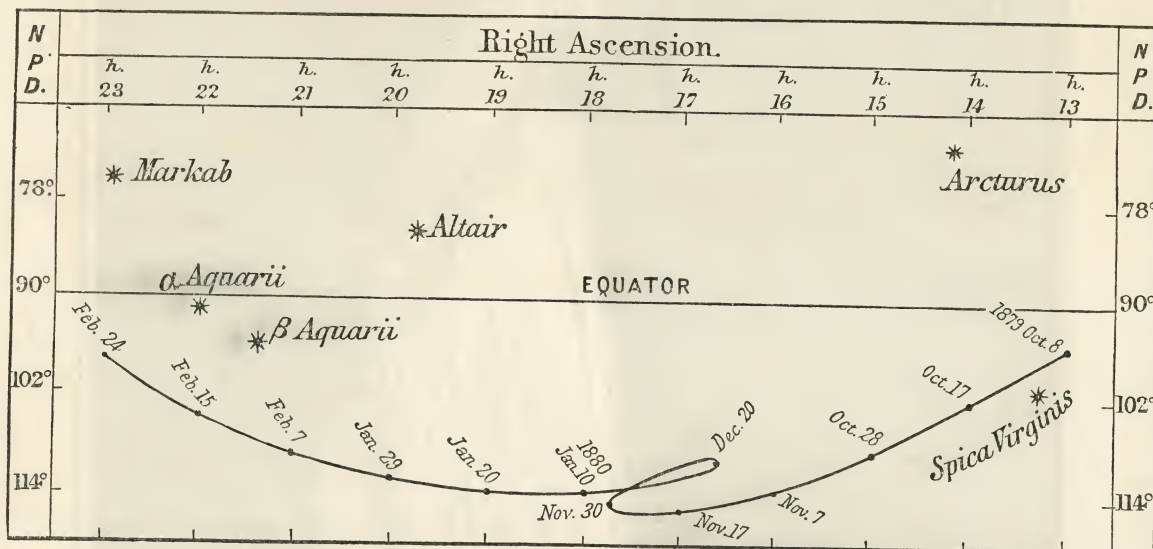

MARS is a morning star, rising at 5h. 11m. a.m. on the 1st, at 5h. 5m. a.m. on the 10th, at 4h. 55m. on the 20th, and at 4h. 47m. a.m. on the last day, or 2h. 3m. before sunrise. He is near the Moon on the 16th and 17th. He is due south on the 1st at 9h. 4m. a.m., on the 14th at 8h. 53m. a.m., and on the last day at 8h. 42m. a.m.

JUPITER sets on the 5th at the same time as the Sun, and from this day and till Sept. 1 he sets in daylight; he rises on the 10th at 7h. 28m. a.m., or 3 minutes after sunrise; on the 20th, at 6h. 54m., or 13 minutes before the Sun rises; and on the last day he rises at 6h. 29m. a.m. He is in conjunction with the Sun on the 8th, and near the Moon on the 20th. He is due south on the 1st at 0h. 40m. p.m., on the 15th at 1h. 55m. a.m., and on the last day at 1h. 16m. a.m.

SATURN is an evening star, and sets on the 1st at 9h. 10m. p.m., on the 10th at 8h. 38m. p.m., on the 20th at 8h. 6m. p.m., and on the last day at 7h. 43m. p.m., or 2h. 7m. after sunset. He is near the Moon on the 23rd. He is due south on the 1st at 3h. 16m. p.m., on the 15th at 2h. 26m. p.m., and on the last day at 1h. 41m. p.m.

MARCH.

THE MOON is near Mars on the morning of the 17th, and to the right of the planet; and she is situated to the left of him on the morning of the 18th. She is near Jupiter on the morning of the 20th. She is near Saturn during both the morning and evening hours of the 23rd, being to the right of the planet in the morning, and to the left in the evening; but the Moon is but one day old. She is near Mercury on the 24th, and near Venus during the evening hours of the 25th. Her phases or times of change are:—

Path of Mercury from October 8, 1873; to February 24, 1880.

First Quarter on the 1st at 58 minutes after 7h. in the morning.	
Full Moon " 8th " 9 " 1 " afternoon.	
Last Quarter " 15th " 41 " 3 " morning.	
New Moon " 22nd " 4 " 9 " afternoon.	
First Quarter " 31st " 5 " 1 " morning.	

She is nearest the Earth on the 10th, and at her greatest distance on the 25th. MERCURY is an evening star during this month. On the 5th he sets at the same time as the Sun; on the 12th he sets at 6h. 39m., or 42 minutes after the Sun; and on the 27th he sets at 8h. 15m., or 1h. 53m. after the Sun; and at the end of the month is favourably situated for observation. He is in superior conjunction with the Sun on the 4th, near Saturn on the 15th, in his ascending node on the 16th, at his least distance from the Sun on the 21st, near the Moon on the 24th, and at his greatest eastern elongation (18 deg. 47 min.) on the 29th.

VENUS is an evening star, setting on the 2nd at 7h. 33m., or 1h. 54m. after the Sun; on the 22nd she sets at 8h. 37m., and on the last day at 9h. 6m., or 2h. 36m. after the Sun. She is near Saturn on the 3rd, near the Moon on the 25th, and in her ascending node on the 30th.

MARS is a morning star, rising on the 2nd at 4h. 43m. a.m., on the 12th at 4h. 28m., on the 22nd at 4h. 11m., and on the last day at 3h. 53m. a.m., or 1h. 48m. before the Sun. He is near the Moon on the 17th. He is due south on the 1st at 8h. 41m. a.m., on the 15th at 8h. 29m. a.m., and on the last day at 8h. 15m. a.m.

JUPITER rises on the 2nd at 6h. 19m. a.m., on the 12th at 5h. 44m. a.m., on the 22nd at 5h. 10m. a.m., and on the last day at 4h. 39m. a.m., or 1 hour 2 minutes before the Sun. He is near the Moon on the 20th. He is due south on the 1st at 11h. 13m. a.m., on the 15th at 10h. 30m. a.m., and on the last day at 9h. 41m. a.m.

SATURN sets on the 2nd at 7h. 33m. p.m., or 1h. 54m. after sunset; on the 12th at 7h. 1m. p.m., on the 22nd at 6h. 29m., or 15 minutes after sunset; and on the 25th at about the same time as the Sun, after which he sets in daylight, or before the Sun. He is near the Moon on the 23rd, and in con-

junction with the Sun on the 26th. He is due south on the 1st at 1h. 37m. p.m., on the 15th at 0h. 48m. p.m., and on the last day at 11h. 53m. a.m.

APRIL.

THE MOON is near Mars during the morning hours of the 15th and 16th, being situated to the right on the morning of the former, and to the left on the morning of the latter day. She is near Jupiter and to the left of the planet on the morning of the 17th; she is near Saturn on the morning of the 20th, and Mercury on the 21st; but both the planet and the Moon are too near the Sun to be seen. On the evening of the 24th she is near Venus. Her phases or times of change are:—

Full Moon on the 6th at 24 minutes after 10h. in the afternoon.	
Last Quarter " 13th " 9 " 2 " afternoon.	
New Moon " 21st " 56 " 1 " afternoon.	
First Quarter " 29th " 16 " 2 " afternoon.	

She is nearest the Earth on the 7th, and most distant from it on the 21st.

MERCURY is an evening star, and favourably situated for observation at the beginning of the month. He sets on the 1st at 8h. 26m. p.m., or 1h. 55m. after the Sun; on the 6th at 8h. 18m. p.m.; on the 11th at 7h. 52m. p.m., or 1h. 6m. after the Sun; on the 16th at 7h. 12m. p.m., and on the 17th and 18th nearly at the same time as the Sun. He rises on the 21st at 4h. 37m. a.m., and on the 26th at 4h. 21m. a.m., or 24 minutes before the Sun. He is stationary among the stars (see diagram) on the 7th, and again on the 29th, in inferior conjunction with the Sun on the 17th, near the Moon on the 21st, and in his descending node on the 24th.

VENUS is an evening star, setting on the 1st at 9h. 10m. p.m., on the 11th at 9h. 41m. p.m., on the 21st at 10h. 13m. p.m. and on the last day at 10h. 38m. p.m., or 3h. 19m. after the Sun. She is near the Moon on the 24th.

MARS is a morning star, rising on the 1st at 3h. 51m. a.m., on the 11th at 3h. 29m. a.m., on the 21st at 3h. 7m. a.m., and on the last day at 2h. 44m. a.m., or 1h. 53m. before the Sun rises. He is near the Moon on the

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

15th. He is due south on the 1st at 8h. 14m. a.m., on the 15th at 8h. 0m. a.m., and on the last day at 7h. 44m. a.m.

JUPITER is a morning star, rising 1h. 3m. before the Sun on the 1st, at 3h. 59m. a.m. on the 11th, at 8h. 23m. a.m. on the 21st, and at 2h. 51m. a.m., or 1h. 46m. before the Sun on the last day. He is near the Moon on the 17th. He is due south on the 1st at 9h. 3m. a.m., on the 15th at 8h. 53m. a.m., and on the last day at 8h. 4m. a.m.

SATURN, at the beginning of this month, rises nearly at the same time as the Sun. On the 11th he rises at 5h. 5m. a.m., or 10 minutes before the Sun; on the 21st at 4h. 28m. a.m., and on the last day at 3h. 55m. a.m. He is near the Moon on the 20th. He is due south on the 1st at 11h. 49m. a.m., in the middle of the month at 11h. 1m. a.m., and on the last day at 10h. 8m. a.m.

MAY.

THE MOON is near both Jupiter and Mars on the mornings of the 14th and 15th, being to the right on the former and to the left of the planets on the latter morning; on both mornings the planet Jupiter being to the right of Mars. She is near Saturn on the morning of the 17th, near Mercury on the 19th, and Venus during the evening hours of the 24th. Her phases or times of change are:—

Full Moon on the 6th at 12 minutes after 6h. in the morning.	
Last Quarter " 13th " 36 " 2 " morning.	
New Moon " 21st " 50 " 5 " morning.	
First Quarter " 28th " 37 " 11 " afternoon.	

She is nearest the Earth on the 5th, and at her greatest distance on the 18th. MERCURY is a morning star, rising on the 1st at 4h. 7m. a.m., or 28 minutes before the Sun; on the 16th at 3h. 35m. a.m., and on the last day at

3h. 11m. a.m., or 41 minutes before the Sun. He is not well placed for observation. He is at his greatest distance from the Sun on the 4th, at his greatest western elongation (25 deg. 40 min.) on the 15th, and near the Moon on the 19th.

VENUS is an evening star, setting at 10h. 41m. p.m. on the 1st; at 11h. 1m. p.m. on the 11th, or 3h. 25m. after the Sun; at 11h. 14m. p.m. on the 21st; and at 11h. 16m. p.m. on the last day, or 3h. 13m. after sunset. She is at her least distance from the Sun on the 2nd, and near the Moon on the 24th.

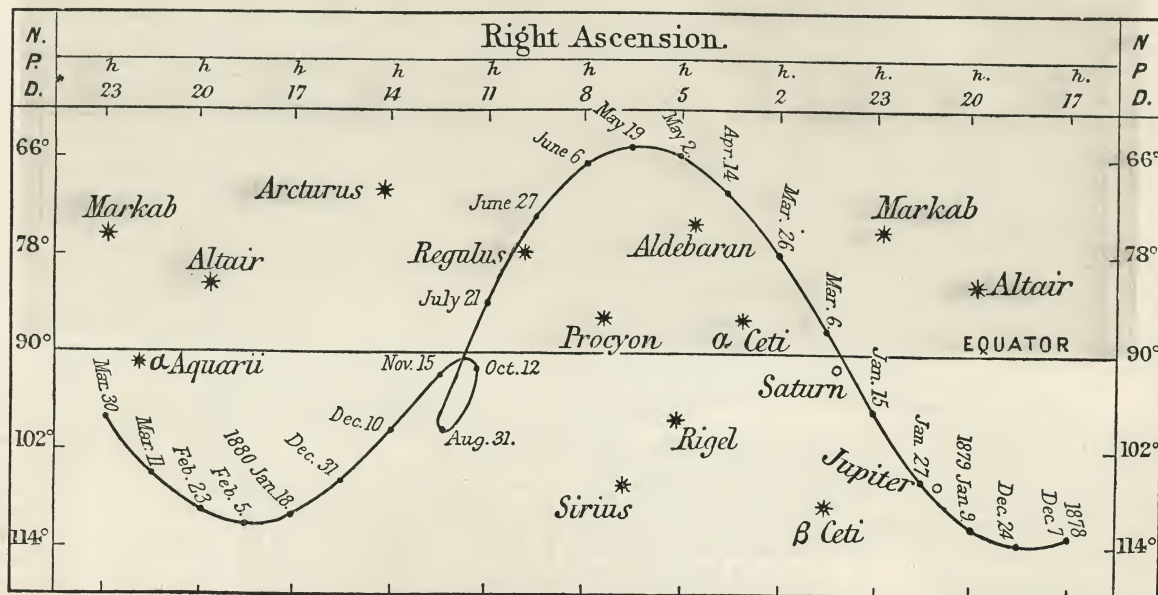

MARS is a morning star, rising on the 1st at 2h. 42m. a.m., on the 11th at 2h. 17m. a.m., on the 21st at 1h. 51m. a.m., and on the last day at 1h. 26m. a.m. He is near Jupiter on the 9th, and near the Moon on the 14th. He is due south on the 1st at 7h. 43m. a.m., on the 15th at 7h. 27m. a.m., and on the last day at 7h. 7m. a.m.

JUPITER is a morning star, rising on the 1st at 2h. 47m. a.m., or 1h. 48m. before the Sun; on the 11th at 2h. 11m. a.m., on the 21st at 1h. 35m. a.m., and on the last day at 0h. 57m. a.m. He is near the Moon on the 14th. He is due south on the 1st at 8h. 1m. a.m., on the 15th at 7h. 14m. a.m., and on the last day at 6h. 18m. a.m.

SATURN rises on the 1st at 3h. 51m. a.m., or 44 minutes before the Sun; on the 11th at 3h. 13m. a.m., on the 21st at 2h. 36m. a.m., and on the last day at 1h. 59m. a.m., or 1h. 53m. before the Sun. He is near the Moon on the 17th. He is due south on the 1st at 10h. 5m. a.m., and on the last day at 8h. 18m. a.m.

JUNE.

THE MOON is near Jupiter on the morning of the 11th. She is very near Mars during the morning hours of the 13th, being a little to the left of the

Path of Venus from December 7, 1878; to March 30, 1880.

planet. She is to the left of and near Saturn during the morning hours of the 14th, near Mercury during the morning hours of the 20th, and near Venus during the evening hours of the 23rd. Her phases or times of change are:—

Full Moon on the 4th at 36 minutes after 1h. in the afternoon.	
Last Quarter " 11th " 56 " 4 " afternoon.	
New Moon " 19th " 20 " 8 " afternoon.	
First Quarter " 27th " 56 " 5 " morning.	

She is nearest the Earth on the 3rd, and at her greatest distance on the 15th. MERCURY is a morning star at the beginning of the month, and an evening star at the end, but not well situated for observation. He rises on June 5 at 3h. 10m. a.m., and on the 20th at 3h. 43m. a.m., or 44 minutes after the Sun, and on the last day he sets 61 minutes after sunset. He is in his ascending node on the 12th, at his least distance from the Sun on the 17th, in superior conjunction with the Sun on the 18th at midnight, and near the Moon on the 20th.

VENUS is an evening star, setting on the 1st at 11h. 15m. p.m., on the 10th at 11h. 9m., on the 20th at 10h. 56m., and on the last day at 10h. 35m., or 2h. 17m. after the Sun. She is near the Moon on the 23rd.

MARS rises on the 1st at 1h. 23m. a.m., on the 10th at 0h. 58m. a.m., on the 20th at 0h. 30m. a.m., and on the last day at 0h. 3m. a.m., and at about midnight on the same day. He is near the Moon on the 13th, and near Saturn on the last day. He is due south on the 1st at 7h. 6m. a.m., on the 15th at 6h. 47m. a.m., and on the last day 6h. 26m. a.m.

JUPITER is a morning star, rising on the 1st at 0h. 53m. a.m., on the 10th at 0h. 19m. a.m., on the 19th at 11h. 42m. p.m., and on the 29th at 11h. 4m. p.m., and is visible throughout the night after these times. He is in quadrature with the Sun on the 2nd, and near the Moon on the 11th. He is due south on the 1st at 6h. 15m. a.m., on the 15th at 5h. 24m., and on the last day at 4h. 27m. a.m.

SATURN rises on the 1st at 1h. 55m. a.m., on the 10th at 1h. 21m. a.m., on the 20th at 0h. 43m. a.m., on the 30th at 0h. 5m. a.m. He is near the

Moon on the 14th. He is due south on the 1st at 8h. 14m. a.m., on the 10th at 7h. 42m. a.m., on the 20th at 7h. 5m. a.m., and on the last day at 6h. 28m. a.m.

JULY.

THE MOON is near Jupiter during the morning hours of the 8th, and to the left of the planet during the night hours of the same day and morning hours of the 9th. She is near Saturn from the time of Moon rising on the 10th and throughout the night. On the 11th the Moon and Mars rise nearly together, and are near together throughout the night. On the 21st she is near Mercury. She is to the right of Venus during the evening hours of the 22nd, and to the left during the evening hours of the 23rd. Her phases or times of change are:—

Full Moon on the 3rd at 38 minutes after 9h. in the afternoon.	
Last Quarter " 11th " 54 " 8 " morning.	
New Moon " 19th " 6 " 9 " morning.	
First Quarter " 26th " 36 " 10 " morning.	

She is nearest the Earth on the 1st and 28th, and most distant on the 13th.

MERCURY is an evening star, setting on the 5th at 9h. 26m. p.m.; on the 10th at 9h. 25m. p.m.; or 1h. 12m. after the Sun; on the 15th at 9h. 18m., or 1h. 9m. after the Sun; on the 20th at 9h. 8m.; and on the 30th at 8h. 36m., or 47 minutes after sunset. He is in his descending node on the 20th, near the Moon on the 21st, at his greatest eastern elongation (27 deg. 9 min.) on the 27th, and at the greatest distance from the Sun on the last day.

VENUS is an evening star, setting on the 1st at 10h. 32m. p.m.; on the 10th at 10h. 10m. p.m.; or 1h. 43m., or 1h. 39m. after the Sun; and on the 30th she sets at 9h. 11m. p.m. She is at her greatest eastern elongation (45 deg. 33 min.) on the 16th, in her descending node on the 19th, and near the Moon on the 23rd.

MARS rises on the 1st at two or three minutes before midnight, on the 9th at 11h. 37m. p.m., on the 19th at 11h. 9m. p.m., and on the 29th at 10h. 42m. p.m., and is visible afterwards throughout the night. He is at

FAMAGOSTA, THE ANCIENT PORT OF CYPRUS.
FROM "THE ILLUSTRATED LONDON NEWS."

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

(Continued from page 41.)

his least distance from the Sun on the 9th, near the Moon on the 11th, and in quadrature with the Sun on the 22nd. He is due south on the 1st at 6h. 25m. a.m., on the 15th at 6h. 4m. a.m., and on the last day at 5h. 39m. a.m.

JUPITER rises on the 9th at 10h. 24m. p.m., on the 19th at 9h. 44m. p.m., and on the 29th at 9h. 4m. p.m., being 1h. 14m. after sunset; and he is visible throughout the nights after these times. He is stationary among the stars (see diagram) on the 2nd, and near the Moon on the 8th. He is due south on the 1st at 4h. 23m. a.m., on the 15th at 3h. 27m. a.m., and on the last day at 2h. 20m. a.m.

SATURN rises on the 1st twice in the same day, at about 0h. 1m. a.m., and again at 11h. 57m. p.m.; on the 9th at 11h. 26m. p.m.; on the 19th at 10h. 47m. p.m.; and on the 29th at 10h. 8m. p.m., or 2h. 18m. after sunset, and is visible throughout the night after these times. He is in quadrature with the Sun on the 7th at midnight, near the Moon on the 11th, and stationary among the stars (see diagram) on the 29th. He is due south on the 1st at 6h. 24m. a.m., on the 15th at 5h. 31m. a.m., and on the last day at 4h. 28m. a.m.

AUGUST.

THE MOON and Jupiter rise nearly together on the evening of the 4th, and remain near each other throughout the night. From the time of Moon rising on the 7th she is near and to the left of Saturn throughout the night. She is also near to and on the left of Mars from the time of rising throughout the night. On the 18th she is near Mercury; on the 20th she is near Venus; and on the 31st a second time near Jupiter, being to the right of the planet in the early evening hours; the nearest approach will be about

10h., when the planet will be a little south of the Moon, and after this time the Moon will move to the left of the planet. Her phases or times of change are:—

Full Moon	on the 2nd at 12 minutes after 7h.	in the morning.
Last Quarter	" 10th " 9 "	" 2 " morning.
New Moon	" 17th " 11 "	" 8 " afternoon.
First Quarter	" 24th " 12 "	" 3 " afternoon.
Full Moon	" 31st " 58 "	" 6 " afternoon.

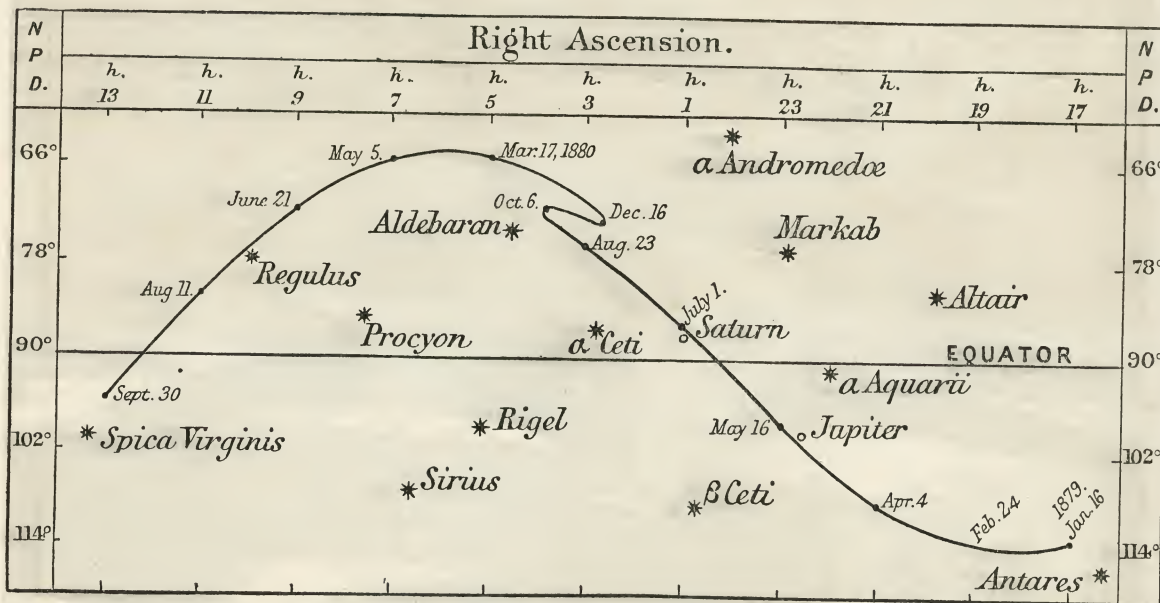

She is nearest the Earth on the 22nd, and at her greatest distance on the 9th.

MERCURY is badly situated for observation. He sets on the 4th at 8h. 16m., or 35 minutes after the Sun; and on the 15th Mercury and the Sun set nearly together; and from this time to Oct. 2 he sets in daylight. On the 25th the Sun and Mercury rise nearly at the same time; and on the 29th the planet rises about 41 minutes before the Sun. He is stationary among the stars (see diagram) on the 9th, near the Moon on the 18th, and in inferior conjunction with the Sun on the 24th.

VENUS is an evening star, setting on the 1st at 9h. 4m., or 1h. 18m. after the Sun; this interval decreases to 1h. 3m. by the 9th, to 41 minutes by the 19th, and to 16 minutes by the 29th, on which day she sets at 7h. 9m. p.m. She is at her greatest brilliancy on the 19th, near the Moon on the 20th, and stationary among the stars (see diagram) on the last day of the month.

MARS rises on the 8th at 10h. 15m. p.m., on the 15th at 9h. 47m. p.m., and on the 28th at 9h. 18m. p.m., and is visible afterwards throughout the night. He is near the Moon on the 9th; he is due south on the 1st at 5h. 37m. a.m., on the 15th at 5h. 12m. a.m., and on the last day at 4h. 38m. a.m.

JUPITER rises on the 8th at 8h. 23m. p.m., or 49 minutes after the Sun; on the 18th at 7h. 42m. p.m.; and on the last day he rises very nearly at the

Path of Mars from January 16, 1879; to September 30, 1880.

same time as the Sun sets, and from this day he rises in daylight, or before the Sun sets. He is near the Moon on the 4th, and again on the last day, and in opposition to the Sun on the last day. He is due south on the 1st at 2h. 16m. a.m., on the 15th at 1h. 16m. a.m., and on the last day at 0h. 5m. a.m.

SATURN rises on the 8th at 9h. 29m. p.m., on the 18th at 8h. 49m. p.m., on the 28th at 8h. 9m. p.m., or 1h. 14m. after sunset, and is visible throughout the night after these times. He is near the Moon on the 7th. He is due south on the 1st at 4h. 24m. a.m., on the 15th at 3h. 29m. a.m., and on the last day at 2h. 23m. a.m.

SEPTEMBER.

THE MOON is near Saturn during the evening hours of the 3rd, being situated to the right of the planet, the space decreasing until about midnight, when the Moon will be the higher of the two, and from this time the Moon will pass to the left of the planet during the morning hours of the 4th day. During the night common to the 6th and 7th she will be near Mars; the nearest approach will be at about 2 a.m. on the 7th. She is near Mercury on the morning of the 15th, near Venus on the morning of the 17th, and to the right of Saturn a second time during the evening and night hours of the last day of the month. Her phases or times of change are:—

Last Quarter	on the 8th at 4 minutes after 8h.	in the afternoon.
New Moon	" 16th " 57 "	" 5 " morning.
First Quarter	" 22nd " 19 "	" 9 " afternoon.
Full Moon	" 30th " 17 "	" 9 " morning.

She is nearest the Earth on the 18th, and at her greatest distance on the 6th.

MERCURY is a morningstar, rising on the 3rd at 3h. 55m. a.m.; on the 8th at 3h. 42m., or 1h. 43m. before the Sun; on the 13th at 3h. 51m., or 1h. 41m. before sunrise; on the 18th at 4h. 14m.; and on the 28th at 5h. 17m., or 39 minutes before the Sun. He is stationary among the stars (see diagram) on the 1st, in his ascending node on the 8th, at his greatest western elongation (17 deg. 57 min.) on the 9th, at his least distance from the Sun on the 13th, and near the Moon on the 15th.

VENUS sets very nearly at the same time as the Sun at the beginning of the month, and is badly situated for observation till towards the end of the

month. On the 30th she rises at 5h. 29m. a.m., or half an hour before sunrise. She is near the Moon on the 17th, and in inferior conjunction with the Sun on the 24th.

MARS rises at 8h. 48m. p.m. on the 7th, or 2h. 16m. after sunset; at 8h. 16m. p.m. on the 17th; and at 7h. 40m. p.m. on the 27th; and is visible after these times throughout the night. He is near the Moon on the 7th. He is due south on the 1st at 4h. 36m. a.m., on the 15th at 4h. 0m. a.m., and on the last day at 3h. 13m. a.m.

JUPITER is visible throughout the night at the beginning of the month; on the 9th he sets at 4h. 36m. a.m., or 50 minutes before the Sun rises; on the 19th he sets at 3h. 49m. a.m.; and on the 29th at 3h. 4m. a.m., or 2h. 54m. before sunrise. He is near the Moon on the 28th. He is due south on the 1st at 11h. 56m. p.m., on the 15th at 10h. 54m. p.m., and on the last day at 9h. 49m. p.m.

SATURN rises on the 7th at 7h. 30m., or 58 minutes after sunset; on the 17th at 6h. 49m. p.m.; and on the 27th at 6h. 8m. p.m., or 21 minutes after the Sun. He is near the Moon on the 3rd and 4th, and again during the evening hours of the last day. He is due south on the 1st at 2h. 19m. a.m., on the 15th at 1h. 21m. a.m., and on the last day at 0h. 18m. a.m.

OCTOBER.

THE MOON is near Saturn during the morning hours of the first day; she is near Mars during the night common to the 4th and 5th; she is near Venus on the mornings of the 13th and 14th; she is near Mercury on the 16th; she is near Jupiter during the evening hours of the 24th, and to the left of the planet on the 25th; she is near and to the right of Saturn during the night hours of the 27th and morning hours of the 28th, and left of the planet during the evening and night hours of the 28th; and she is near Mars a second time in the month during the evening hours of the last day. Her phases or times of change are:—

Last Quarter	on the 8th at 43 minutes after 1h.	in the afternoon.
New Moon	" 15th " 9 "	" 3 " afternoon.
First Quarter	" 22nd " 18 "	" 6 " morning.
Full Moon	" 30th " 10 "	" 2 " morning.

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

She is nearest the Earth on the 16th, and at her greatest distance on the 4th and 31st.

MERCURY is not favourably situated for observation. He sets on the 2nd nearly at the same time as the Sun, and afterwards after the Sun—on the 8th by 8 minutes, on the 18th by 15 minutes, and on the 28th at 5h. 1m., or 22 minutes after sunset. He is in superior conjunction with the Sun on the 6th, near the Moon on the 16th, in his descending node on the 16th, and at his greatest distance from the Sun on the 27th.

VENUS is a morning star, rising on the 1st at 5h. 21m. a.m.; on the 8th at 4h. 31m., or 1h. 43m. before the Sun; on the 18th at 3h. 42m. a.m.; and on the 28th at 3h. 13m. a.m., or 3h. 35m. before sunrise. She is stationary among the stars (see diagram) on the 12th, near the Moon on the 13th, and at her greatest brilliancy (a second time this year) on the last day of the month.

MARS rises on the 7th at 7h. 0m. p.m.; on the 17th at 6h. 16m. p.m., and on the 27th at 5h. 26m. p.m., or three quarters of an hour only after sunset; but is visible afterwards throughout the night. He is near the Moon on the 4th, and again on the last day, and stationary among the stars (see diagram) on the 6th. He is due south on the 1st at 3h. 9m. a.m., on the 15th at 2h. 13m. a.m., and on the last day at 1h. 54m. a.m.

JUPITER is an evening star, and on the 9th sets at 2h. 19m. a.m., on the 19th at 1h. 37m. a.m., and on the 29th at 0h. 57m. a.m., and is visible from sunset till these times. He is near the Moon on the 25th, and stationary among the stars (see diagram) on the 29th. He is due south on the 1st at

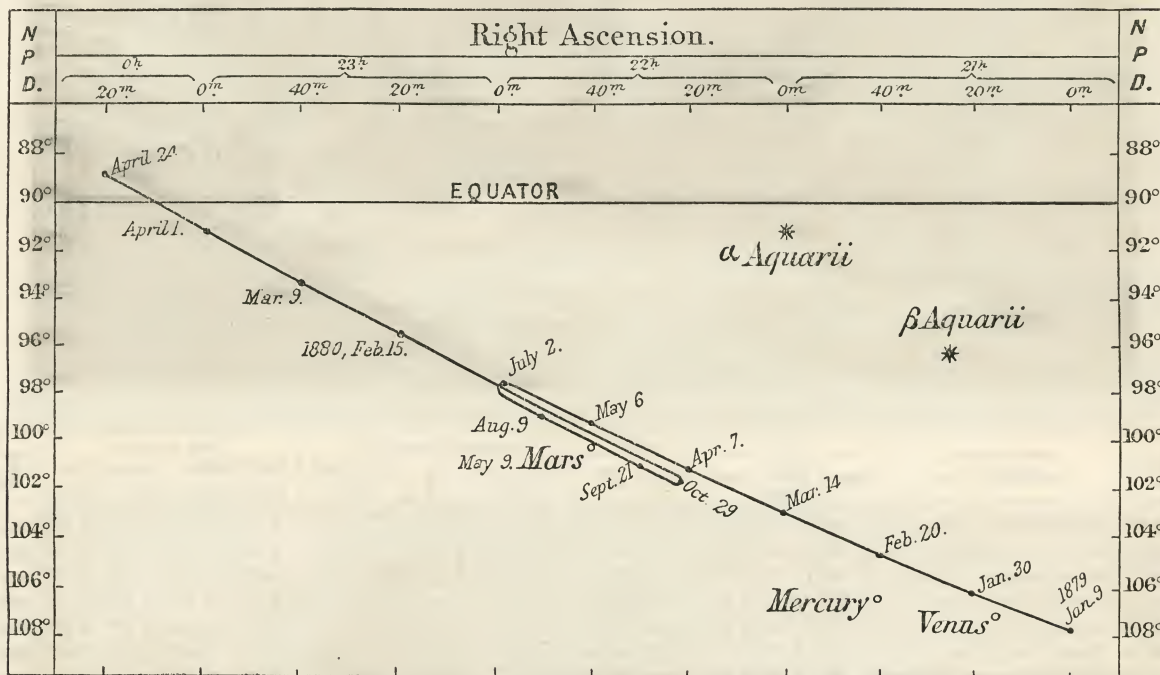

9h. 45m. p.m., on the 15th at 8h. 46m. p.m., and on the last day at 7h. 42m. p.m.

SATURN, at the beginning of this month, rises nearly at the same time the sun is setting, and afterwards he rises in daylight. He sets on the 6th nearly at the same time as the Sun rises, on the 9th he sets 20 minutes before sunrise, on the 19th he sets at 5h. 12m. a.m.; and on the 29th at 4h. 29m., or 2h. 21m. before the Sun rises; and he is visible throughout the night till these times. He is near the Moon on the 1st, and again on the 28th; and in opposition to the Sun on the 5th. He is due south on the 1st at 0h. 14m. a.m., on the 15th at 11h. 10m. p.m., and on the last day at 10h. 3m. p.m.

NOVEMBER.

THE MOON is near and to the left of Venus during the morning hours of the 11th. She is near Mercury on the 15th, she is near Jupiter during the evening hours of the 20th and 21st, she is near Saturn during the evening hours of the 23rd and the 24th, and she is near and to the right of Mars during the night common to the 26th and 27th, and to the left of Mars during the following night. Her phases or times of change are:—

Last Quarter on the 7th at 55 minutes after 5h. in the morning.	
New Moon " 14th " 38 " 0 " morning.	
First Quarter " 2th " 55 " 6 " afternoon.	
Full Moon " 28th " 57 " 8 " afternoon.	

Path of Jupiter from January 9, 1879; to April 24, 1880.

She is nearest the Earth on the 14th, and at her greatest distance on the 27th.

MERCURY sets on the 2nd at 4h. 56m., or 25 minutes after the Sun; on the 17th at 4h. 54m., or 45 minutes after the Sun. He is near the Moon on the 15th, at his greatest eastern elongation (21 deg. 56 min) on the 21st, and stationary among the stars (see diagram) on the last day of the month.

VENUS is a morning star, rising on the 7th at 3h. 1m. a.m., on the 17th at 3h. 2m. a.m., and on the 27th at 3h. 12m. a.m. She is in her ascending node on the 9th, and near the Moon on the 11th.

MARS on the 6th rises at 4h. 35m. p.m., and on the 9th at 4h. 20m. p.m., being at the same time as the Sun, and after this he rises in daylight. He sets on the 14th at the same time as the Sun rises—viz., 7h. 15m. a.m. On the 28th he sets at 6h. 1m. a.m., or 1h. 39m. before the Sun rises. He is in his ascending node on the 10th, in opposition to the Sun on the 12th, and near the Moon on the 27th. He is due south on the 1st, at 0h. 48m. a.m., on the 15th at 11h. 27m. p.m., and on the last day at 10h. 10m. p.m.

JUPITER is an evening star; he sets on the 7th at 18 minutes after midnight, on the 17th at 11h. 43m. p.m., and on the 27th at 11h. 7m. p.m. He is near the Moon on the 21st, and in quadrature with the Sun on the 26th. He is due south on the 1st at 7h. 38m. p.m., and on the last day at 5h. 51m. p.m.

SATURN sets on the 8th at 3h. 46m. a.m., on the 18th at 3h. 4m. a.m., and on the 28th at 2h. 22m. a.m., and is visible throughout the night till these times. He is near the Moon on the 24th. He is due south on the 1st at 9h. 59m. p.m., on the 15th at 9h. 1m. p.m., and on the last day at 8h. 0m. p.m.

DECEMBER.

THE MOON is near Venus on the morning of the 10th, near Mercury on the 13th. She is near Jupiter during the evening hours of the 18th, she is near Saturn during the evening hours of the 21st, and near Mars, being west of the planet, during the evening hours of the 23rd and early morning hours of the 24th, and east of the planet during the evening hours of the same day. Her phases or times of change are:—

Last Quarter on the 6th at 43 minutes after 7h. in the afternoon.	
New Moon " 13th " 4 " 11 " morning.	
First Quarter " 20th " 16 " 11 " morning.	
Full Moon " 28th " 16 " 4 " morning.	

She is nearest the Earth on the 12th, and at her greatest distance on the 25th.

MERCURY is badly situated for observation at the beginning of the month. He sets on the 2nd at 4h. 45m., and on the 11th nearly with the Sun. He rises on the 12th at 7h. 22m. a.m., on the 17th at 6h. 34m. a.m., or one hour and a half before the Sun; on the 22nd at 6h. 13m. a.m., or 1h. 53m. before the Sun; on the 27th he rises 1h. 57m. before sunrise, and on the last day he rises at 6h. 14m. a.m. He is in his ascending node on the 5th, at his least distance from the Sun on the 10th, in inferior conjunction with the Sun on the same day, near the Moon on the 13th, stationary among the stars (see diagram) on the 20th, and at his greatest western elongation (22 deg. 30 min.) on the 30th.

VENUS is a morning star, rising on the 7th at 3h. 26m. a.m.; on the 17th at 3h. 45m. a.m.; on the 27th at 4h. 7m. a.m.; and on the last day of the year at 4h. 15m. a.m. She is at her greatest western elongation (46 deg. 47 min.) on the 4th, near the Moon on the 10th, and at her least distance from the Sun on the 13th.

MARS is visible till the morning hours, setting on the 8th at 5h. 13m. a.m., on the 18th at 4h. 31m. a.m., on the 28th at 3h. 58m. a.m., and on the last day at 3h. 49m. a.m. He is stationary among the stars (see diagram) on the 16th, and near the Moon on the 24th. He is due south on the 1st at 10h. 5m. p.m., on the 15th at 9h. 4m. p.m., and on the last day of the year at 8h. 7m. p.m.

JUPITER is an evening star, setting on the 7th at 10h. 35m. p.m., on the 17th at 10h. 4m. p.m., on the 27th at 9h. 33m. p.m., and on the last day of the year at 9h. 21m. p.m. He is near the Moon on the 18th. He is due south on the 1st at 5h. 47m. p.m., on the 15th at 4h. 59m. p.m., and on the last day of the year at 4h. 5m. p.m.

NOVEMBER:—FOX HUNTING.

DECEMBER:—CHRISTMAS VISITING.

LEIGHTON BROS.

SIR PETER PAUL RUBENS, PAINTED BY HIMSELF.
FROM "THE ILLUSTRATED LONDON NEWS."

THE ILLUSTRATED LONDON ALMANACK FOR 1879.

(Continued from page 45.)

SATURN is an evening star, setting on the 8th at 1h. 42m. a.m., on the 18th at 1h. 3m. a.m., on the 28th at 0h. 25m. a.m., and on the last day at Ch. 14m. a.m., and is visible from sunset till these times. He is stationary among the stars (see diagram) on the 13th, near the Moon on the 21st, and in quadrature with the Sun on the last day of the year. He is due south on the 1st at 7h. 56m. p.m.; on the 15th at 7h. 1m. p.m.; and on the last day of the year at 5h. 59m. p.m.

ECLIPSES IN THE YEAR 1879.

DURING the year 1879 there are only three Eclipses—two of the Sun and one of the Moon.

The first is an Annular Eclipse of the Sun, on Jan. 22, but invisible from any part of Europe. Its time of central and annular Eclipse begins at 3 minutes after 10 o'clock a.m., Greenwich mean time, at a place near the western coast of South America, a little north of Valparaiso, thence across South America to its eastern coast, near the Rio Grande; across the South Atlantic Ocean to the western coast of Africa at a point a little north of the Orange River, thence across Africa tending northwards to the west coast near Mozambique, thence passing about 15 deg. north of Madagascar, and ending in the Indian Ocean at a point near 64 deg. east of Greenwich, and near latitude 8 deg. N., at 1h. 43m. p.m., Greenwich mean time.

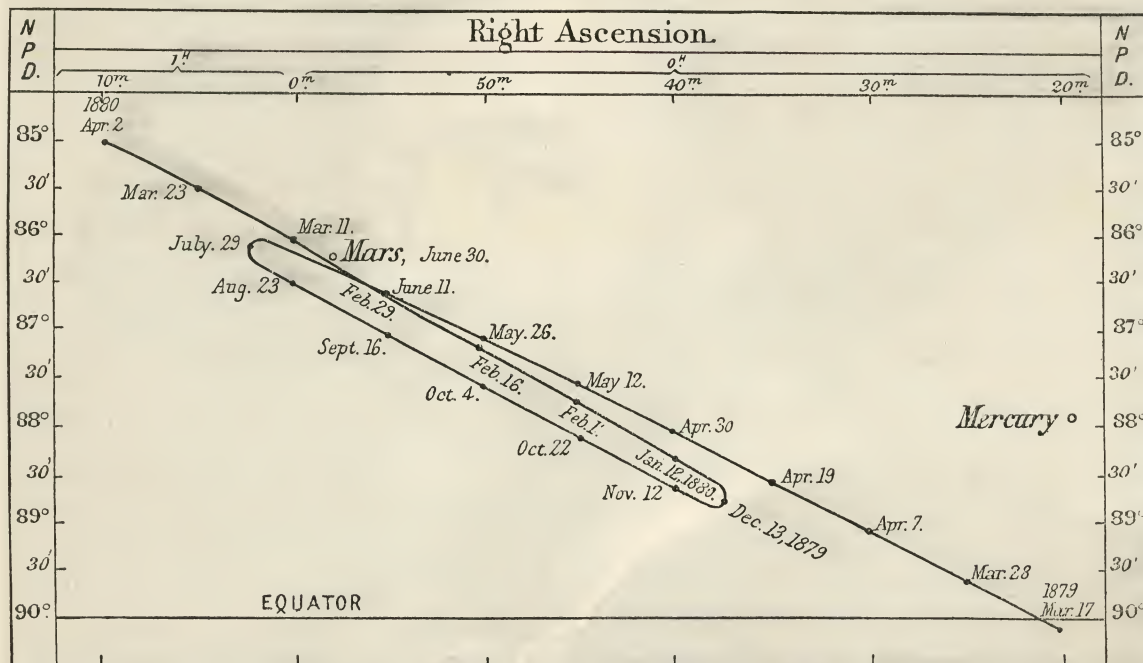

The northern and southern limiting lines of this Eclipse are somewhere more than 30 deg. north and south of the central line; and a Partial Eclipse will be visible at all places within these boundary lines, very large near the central line and small near the boundary lines.

At the Cape of Good Hope, where the central line passes at some distance north of the Cape, the Eclipse will be large; at the time of the greatest phase nearly three fourths of the Sun's diameter will be eclipsed. At Madagascar about three fifths of the Sun's diameter will be obscured.

The second Eclipse is also an annular Eclipse of the Sun on July 19, invisible from the British Isles, and seen as a small eclipse only from the south of Europe or in the south of France, Austria, and a little larger in Spain, the Mediterranean, and the Black Sea.

The line of Central and Annular Eclipse begins at 13 minutes after 7h. a.m. in the North Atlantic Ocean, a few degrees from the West Coast of Africa, and south-west of Sierra Leone, thence passing near Sierra Leone, almost following the river Niger to south of Timbuctoo, still tending northwards to a point 18 deg. of north latitude, then turning southward, crossing Nubia, the southern end of the Red Sea, and western end of the Sea of Babel Mandeb to the West Coast of Africa, south of Cape Guardafui, to the Indian Ocean, crossing the Equator at a point nearly 60 deg. E. longitude to a point 98 deg. E. Nearly on the tropic of Capricorn at five minutes to 11 a.m., Greenwich mean time.

The southern boundary line of this Eclipse begins in the South Atlantic

Path of Saturn from March 17, 1879; to April 2, 1880.

Ocean, thence to the West coast of Africa, in latitude about 18 deg., across South Africa to the east coast at Delagoa Bay, and to the south of Madagascar to a point in the Indian Ocean, whose longitude is about 82 deg. E. and latitude 55 deg. S. The northern boundary line passes from the North Atlantic Ocean, south of the British Isles, north of France, across Europe to north of the Caspian Sea, north of Persia, across Hindoostan to a point 7 deg. N. of the Equator in longitude 112 deg., and an Eclipse will take place situated between these boundary lines.

The third Eclipse is a very small one of the Moon on Dec. 28 and is visible from England. The beginning of the eclipse is at 3h. 37m. p.m. By reference to the Almanack pages it will be seen that the time of the Moon rising on this day is 3h. 47m. p.m., 10 minutes after the eclipse has begun. The middle of the eclipse will be at 4h. 26m. p.m., and it will end at a quarter past five o'clock. At the time of the greatest phase, or at the middle of the eclipse, only one sixth part of the Moon's diameter will be obscured.

THE SOLAR ECLIPSE OF 1878.

THE Solar Eclipse of July 29, 1878, was observed by an array of instrumental appliances, and under conditions such as had been seen at no previous eclipse. It was regarded as the return of that of July 18, 1860, when the Moon's shadow crossed the northerly parts of the American continent, and, sweeping over the Atlantic Ocean, passed across Spain and Africa. At La Junta, shortly after two o'clock on July 29, 1878, as the moon cut into the solar disc, the light rapidly waned, and a peculiar yellow colour, gradually changing to a dark neutral tint, overspread the landscape. The cloudless sky became of a leaden hue, and a few minutes before totality Venus and Mercury were plainly visible; immediately afterwards a streak of yellow light seemed to open out along the northern horizon, and the dark shadow rushed across the plain. A few seconds before the Moon's disc completely covered over the Sun, the corona shone out distinctly at 3h. 39m. 20s. (10h. 30m. 27s. Greenwich mean time). From the commencement to the end of the totality, not a trace of Leverrier's long-looked-for planet was detected; but for several seconds after

totality the corona stood out clear and distinct, and slowly faded away. The duration of the totality was 163 seconds, three seconds shorter than the computed time. A fine series of photographs were obtained, in each of which was shown an amount of detail and structure of the corona far beyond anything previously seen. In two of the prominences there was a well defined "filamentous" development, and it was noticed that, with the increased exposure of plates, an extension of the corona took place, as noticed by Schuster in the Siam eclipse. The outlying portions of the prominences seemed to extend between three and four diameters away from the Sun. The western extension exhibiting more of the "filamentous structure." The rose-coloured prominences, usually the most striking objects in a total eclipse, were not seen by any of the La Junta observers. With a Nicol's prism and a thick quartz plate radial polarisation was distinctly observed, the polarisation near the limb of the Moon was about 10 per cent, decreasing outwards. Photographic evidence of polarisation was obtained by exposing gelatino-bromid prepared plates in a Ross symmetrical lens camera of five-inch focus and 0.5 effective aperture, at the back of which was a double-image prism. The plate was exposed about eighty seconds. At West Las Animas (latitude 38° 04' and longitude 99° 52' min. 48 sec., west Greenwich) spectroscopic observations of the eclipse were made, and the well-known green line 1474 of Kirchhoff's scale was seen in the continuous spectrum. Line and spectrum, however, disappeared at all points at a height of about eight minutes of arc from the Sun's limb. The violet part of the spectrum were remarkably vivid, and it was possible to see far into the ultra-violet, much further than with ordinary sunlight. Spectroscopic examination of the corona showed a strong continuous spectrum, reaching nearly to the calcium line H, and up to a height of 0.3 of the Sun's diameter no weakening of the spectrum was visible. On examining the green part of the spectrum indications of two lines were observed, but no measurements could be made.

A large number of general observations were made, such as the wonderful transparency of the Colorado atmosphere, the effect produced on animals, on the colours of objects, their visibility, &c., whilst the darkness was far from being so great as was anticipated, although the decrease of temperature, as indicated by Edison's tasimeter, was considerable.
